

Genesis and Beyond

Masculine and Feminine Symbology

Mind is a Logical Entity that is Feeling-based, Nature-based, or Sensory-based. It is an accumulation and categorisation of Thoughts. How would Masculine and Feminine aspects or concepts manifest?

Emotion is Suggestive or Hypothetical Thought. Mentality is Detailed or Theoretical Thought.

Physicality is Experimental or Practical Thought. Mind is a process from Emotional Thought to Mental Thought and then to Physical Thought; a process from Suggestive Thought, to Detailing the Suggestive Thought, and then Experimenting with the Detailed Suggestions.

A Logic state progresses from an Emotional Intellectual Agreement, to a Mental Intellectual Interpretation, and then to a Physical Intellectual Application. A Feeling state initiates the Emotional Intellectual Agreement.

A Common Mind begins with the Attitudinal Feeling of Nature. It then becomes an Emotional Intellectual Agreement of Self-awareness. However, in a Common Mind, Nature can be an Intellectual Agreement of Common Sense as well as an Intellectual Agreement of Self-awareness. Common Logic is the Physical Intellectual Application. It is unbiased. All other Logic states are constructs of Polarised Logic.

In some circles, Nature is perceived to be Feminine, as in the term “Mother Nature”. It is an Attitudinal expression of Feeling, which is a Physically Creative expression of Emotional Intelligence. Emotion has been considered Feminine. Also in some circles, Logic has been considered Masculine. However, Logic can be Emotional, Mental, and Physical. In similar circles, Mentality could be considered Masculine. In the early formation of Mind, Emotional Thought may have been symbolised in the Dream of Mind, which we have determined to be Life, as Feminine. Mental Thought may have been symbolised in the Dream of Mind as Masculine. Physical Thought would be an Experimented or Practiced form of Feminine and Masculine Thought; a merging or collaboration of Emotional and Mental Thought, which would be a collaboration of Feminine and Masculine Thought, Suggestion to Detail and then to Experiment, or Hypothetical to Theoretical and then to Practical. It may have been symbolised or represented in the Dream of Mind, which we have determined to be Life, as creating offspring. If this is so, the offspring may have become hybrids of Emotional and Mental Thought, or hybrids of Feminine and Masculine Thought. They would not be purely Masculine or Feminine, or Mental and Emotional. However, some offspring could have prominent Emotional or Mental Traits. If a Body is the Physical manifestation of those Traits, it could be more prominently Male or Female, and more Mental or Emotional, or it could be difficult to distinguish. In the Dream of Mind, which we have determined to be Life, Male and Female Bodily Traits, and Male and Female Thinking, could become blurred and confused e.g. asexual, homosexual, bisexual, hermaphroditic, intersexual, and transvestite.

Did this occur as the result of a Mind with an Identity crisis? One Mind creating an infinite number of Personalities, and those Personalities not recognising their own reflections of SELF. Alternatively, those Personalities recognising their reflections of SELF but not accepting them as SELF. Either way, it is a crisis; a crisis that only Unity can solve. Either the Dream of Mind will become a symbol of reconciliation, or it will continue to reflect a crisis. It is up to US!

Genesis: Symbolic Temptation

The story of Adam and Eve ripples through most of the well-known Religions. It refers to a Temptation on the part of Eve. Regarding Mind, what did it symbolise?

Life itself is a symbolic representation of Mind and its evolution. It appears to be a Self-perpetuating Dream, a Virtual Reality playing out in the void of Space, which represents Pure Potential. SPACE – Sentient Plasma Attributing Conjugated Entities.

Previously, we referred to Nature as a Physically Creative expression of Emotional Intelligence, which is Attitudinal Feeling suggesting Attitudinal behaviour. It also inferred a Feminine symbolism. Did the concept of Eve refer to Nature, and did the concept of Adam refer to Common Logic? Alternatively, did the concept of Eve refer to a Personalised form of Nature known as Intuition? In that regard, the concept of Adam would have referred to a Personalised form of Common Logic known as Instinct. However, in Religious interpretation, Eve was created from the rib of Adam. What is the symbolic reference?

In Geometrical Thought Harmonics, which is a Language of Thought, Common Logic, which is represented by a Cube, is formed by an Intellectual Agreement of Common Sense, which is represented by two Tetrahedron Pyramids. A Tetrahedron Pyramid represents the Physical Creativity of Common Sense. The interconnectivity of two Tetrahedron Pyramids forms the Physical Intellect of Common Logic. Now it gets interesting. The edges of the Tetrahedron Pyramids form the diagonal ribs of the six Square faces of a Cube. The intersection of those diagonals forms a centre-point. Each of those faces would have a centre-point, which would form the six Points of an Octahedron that represents Nature. From the ribs of Adam was Created Eve. It is purely symbolic.

A Tetrahedron Pyramid is the simplest Pyramid. It has four Equilateral Triangle faces and four Points. An Equilateral Triangle represents the Creative Thought of Imagination. Therefore, a Tetrahedron Pyramid represents the unbiased Physical Creativity of Common Sense.

An Octahedron has eight Equilateral Triangle faces and six Points. It has three centre-dissecting Square planes, which represent Emotional Intellect. The Emotional Intellect planes form the Feeling of Nature. The Equilateral Triangle facets form the Creative Thought of Attitude. Nature is an Attitudinal expression of Feeling, which is a Physically Creative expression of Emotional Intelligence. The Square facets of a Cube form the unbiased Physical or Practical Intelligence of Common Logic.

To what does the Temptation refer? If Nature is Personalised, it becomes Intuition, which has Emotional planes of Intellect, Awareness, and Belief. The Awareness planes, or centre-point Hexagons, are formed by internally directed Pentagon Pyramids, which form impressions of Desire. If Desire were the Temptation, it would explain the symbolic reference of Eve succumbing to Temptation. In addition, Intuition has Emotional Decagon planes, which represent Belief or Choice. Instinct, or Adam, does not have Decagon planes of Belief or Choice. Therefore, only Intuition or Eve would have the Suggestive Choice to succumb to impressions of Desire.

What about the symbolic reference of the Tempter referred to as Satan? An Icosahedron represents Will, which is an expression of Desire. It has Mental Pentagon planes of Motive and Mental Equilateral Triangle planes of Creative Thought or Imagination. It also has Physical Equilateral Triangle planes of Creative Thought or Imagination that form the expressions of Desire. Will is not Emotional. It is a Physically Creative expression of Mental Motivation. If Mental Thought were regarded as a Masculine Trait, then Will would be regarded as Masculine. The symbolic inference of Satan has been referred to as Masculine. It has also been inferred that Satan once expressed the “Will of God”.

How can we explain the symbolic reference of a God or Gods? In early times, there were many symbolic inferences of Gods. Some were Feminine, and some were Masculine. However, in later times, a singular God was Imagined and it was inferred to be Masculine. Why? The term ‘Will of God’ may shed some Light. In Geometrical Thought Harmonics, WILL is proposed to be SPIRIT.

Will is Personal and Conscious. Intuition is regarded as Subconscious or Personally programmed. Instinct is Personal and Conscious. The Emotional Awareness of Intuition is programmed by impressions of

Desire. Will is a Physically Creative expression of Mental Motivation or Desire. We need to understand that these aspects of Mind are not separate. They are Complementary. Therefore, Mind itself could be regarded as a God or Divine Entity by its Personalities. However, Mind is an accumulation and categorisation of Thoughts. Pure Potential is the source of that Thought. Therefore, Pure Potential could be regarded as God by the dissociated Personalities of Mind. Adam, Eve, God, and Satan could be symbolic representations formed by Unconsciously connected but Consciously dissociated Personalities trying to explain their Genesis within the Dream of Mind; the Dream of Mind that we have determined to be Life.

Evolution of an Unconscious Common Mind

The inner Potential of Common Logic forms a Common Mind, which is an Agreement of Common Sense. Nature, an Attitudinal expression of Feeling, which is a Physically Creative expression of Emotional Intelligence, forms that Agreement. The most simple progression or evolution of the Unconscious Common Mind is the development of Self-awareness, which forms a Common Entity Mind. The Emotional Logic of Self-awareness is an Intellectual Agreement formed by Nature, which becomes Nature-based Self-awareness. Emotional Logic is an Agreement of Emotional Intelligence, whereas, Feeling is an expression of Emotional Intelligence forming that Agreement. The development of Self-awareness does not make the Mind Conscious.

The next progression or evolution of Mind is the development of Passion, which forms a Self-awareness-based Nature progressing to a Nature-based Self-awareness. Passion is a creation of Emotional Awareness and forms Passion-based Self-awareness. Self-awareness is a creation of Emotional Awareness programmed by impressions of Attitude and Common Sense. It is also a construct of Emotional Logic.

A Common Mind can progress or evolve exponentially to form many Traits.

Conscious and Subconscious Common Mind

To become Conscious, Mind would need to develop Motive, which is Personal Thought. A Subconscious Mind is Personally programmed. It becomes Reflex Responsive.

A Conscious Common Mind would develop Instinct, which is a Personalised construct of Common Logic formed by Common Sense Agreements. It becomes a Virtual Brain. However, the Potential of a Virtual Brain has Conscious and Subconscious aspects, which form a Virtual Brain-mind. In that Mind, Nature becomes Personalised to form Intuition. However, Self-awareness is not present. Therefore, Entities that reflect that Mind would not be Aware of SELF. They would be Motivated by Instinct in a Personalised Common Logic Reality.

A Virtual Brain-mind forms five aspects other than Instinct from its interconnections. Intuition forms the initial Agreements of Personalised Common Sense. The other Creative interconnections of Common Sense form Personal Conscience and Social or Environmental Conscience. Personal Conscience is a Construct of Belief-interactive Mental Motive Logic Interpretations. It is a Motivational Conscience of declared Personal preferences or Choices. Social or Environmental Conscience is a construct of Love-interactive Practical Creative Logic, which is a Subconscious, personally programmed, or Reflex Responsive Conscience.

The Intellectual interactions of Personalised Common Logic form Interpretations of Language and Species Differentiation, which is a construct of Belief-interactive Practical Motive Logic Applications. It declares Personally preferred Motivational Applications.

At the core of the Virtual Brain-mind, we have Will, a Creative expression of Mental Motivation, which is an expression of Desire. As previously stated, a Virtual Brain-mind is not Aware of SELF. However, it

has Subconscious Awareness through Intuition, which is programmed by impressions of Desire. Previously, we spoke of the temptation of Desire. In that conversation, it was pointed out that Intuition had Emotional Choice, but basic Instinct did not. However, in a Virtual Brain-mind, which is an Instinctual Mind, any Life form that reflected a Virtual Brain-mind would have Intuition. In addition, in a Virtual Brain-mind, Instinct can form impressions of Desire that create Will. Therefore, Will would express the Desires of Instinct. Regarding the symbology of Masculine and Feminine, or Adam and Eve, Will would express the impressionable Desires of Adam.

A simple progression or evolution of the Virtual Brain can form a Personalised Self-awareness in the form of Compassion. It would be Instinctual with an innate potential of Intuition and Compassion, not the aspects of the other Virtual Brain-mind. This Virtual Brain-mind would be Subconsciously Aware of SELF through Compassion.

A Virtual Brain can progress and evolve exponentially to form many Conscious and Subconscious Traits. How would we become Consciously Aware of SELF? What is a Conscious SELF?

Conscious SELF

Conscious Awareness is an interesting concept. Awareness is initially Unconscious. Self-awareness is initially Unconscious. When Awareness or Love becomes Conscious, it automatically becomes Subconscious or programmed Consciousness, as in Compassion and Intuition.

SELF is a Source/Sentient/Sensory/SOUL Expressed or Experienced Life Form. SOUL is a State Of Unified Love; a State Of Awareness. Awareness is an Unconditional Sense Agreement, which can be Emotional, Mental, or Physical. It is a Planar Sense, a Creative Agreement of Love, or Unified Love, which is symbolised as a centre-point Hexagon; a centrally focused impression and expression of Imagination. A Conscious SELF is a Motivated and Personalised state of Awareness, which can be Emotional, Mental, and Physical.

Personalities are formed by merging Intuition with Faith. Faith is a construct of Will formed by Emotional Belief. It becomes a construct of Trust, which is a Belief-based Feeling that suggests Belief-based behaviour. Belief is a declaration of Personal preference or Choice. Combined with Intuition, Faith forms the Identity-based Attitudinal Feeling of Personality, which becomes Subconscious or programmed Consciousness due to the Emotional Awareness of Intuition. Personalities form an Identity Mind or Individuality Mind, which is not a Common Logic Reality. It merges Will, which is an expression of Desire, with Nature, which is an Attitudinal expression of Feeling. Merging Desire and Attitude brings about a Desired Attitude, which forms Personality.

Actonic Virtual Brain: Symbolism of Twelve

In the Geometrical Language of Thought, an Icosahedron represents Will. It has Twelve points forming a Geometrical Sphere. An Acton is a construct of Twelve Icosahedrons of Will, which is an expression of Desire. It forms a larger Icosahedron complex of Will. An Instinct-based Social or Environmental Conscience Acton forms a base design of Instinct as an impression of Desire, and a support design of Social or Environmental Conscience as an expression of Desire. Social or Environmental Conscience is a construct of Love-interactive Creative Logic. The Equilateral Triangles of Creative Thought that form the polar faces of Creative Logic are arranged into Hexagram connections, two overlapping Equilateral Triangles that form a Star of David. When Twelve of these Instinct-based Social or Environmental Conscience Actons connect to a common vortex centre, they form an Intuition-based Fundamental Freetone, a progression or evolution of a Conscious Common Entity Mind, and an evolved Virtual Brain-mind. As this Virtual Brain-mind creates more connections, it forms Intuitive Conspiracy, which is a

combination of Aspiration and Inspiration. Aspiration is a construct and Agreement of Emotional Belief. Inspiration is a construct and Agreement of Emotional Awareness. Intuitive Conspiracy is a construct of Intuitive Aspiration and Intuitive Inspiration. It formed a Faith-related Dreamstate, and this evolved Virtual Brain-mind envisaged a HUMAN BEING. A Higher Understanding Mind And Nature - Brain Expressed Intelligent Natural Guise.

An Actonic Virtual Brain-mind, or an evolved Fundamental Freetone, forms a Fear Acton within its structure, a construct of Will with impressions of Desire formed by Personal Conscience, and an expression of Desire formed by Language and Species Differentiation. They are both constructs of Belief-interactive Motive Logic. One is a Belief-interactive Motive Logic Interpretation, which is Mental Logic, and the other is a Belief-interactive Motive Logic Application, which is Physical Logic. Fear has dominated Life, as we know it. Actonic structure is an evolution of Will.

I would imagine that most Religions and other Belief systems have similar symbolic references of Twelve coming together as One somewhere in their structure. It would have been reflected throughout the Dream of Mind that we call Life.

A Dodecagon also has Twelve points, and represents Synchronicity, which is a collaborative interaction of Imagination, Intellect, and Awareness. When Intuition and Instinctual Respect merge, they form the Synchronicity-based Nature and Synchronised Respect of Mutual Respect, and initiate a Commonality Mind, or Subconscious Synchronicity Mind, which creates a Subconscious or Consciously programmed Common Logic Reality. It is an evolved Virtual Brain-mind.

A Cuboctahedron of Self-awareness has Twelve points. An Unconscious progression of Self-awareness can form Unity Awareness, which creates a Self-assessing Self-awareness. The Cuboctahedrons of Self-awareness interact and form Hexagrams. When Compassion progresses and evolves through Unity Awareness, which is a Self-assessing Self-awareness, it creates Eternal Consideration. It can be an aspect of an evolved Virtual Brain-mind that reflects a Love-interactive system of Nature rather than dominated by Will. It could be regarded as an Unconsciously programmed Conscious Mind, a Christ Mind, or Christ Consciousness.

Christ Mind and Christ-mind

The term CHRIST stands for Cryptic Host Renouncing Indiscriminate Sadistic Traits. It is a state of Mind that wishes no harm to any Being, and seeks not to take advantage of their vulnerable circumstances or conditions. It does not represent or relate to any Religion or God, even though it symbolised the Messiah of Jewish and Christian Faith, and may have been the state of Mind that influenced Jesus, Buddha, Muhammad, Krishna, and many other so-called Enlightened Beings.

Christ Consciousness is a Personalised Christ Mind. As an evolving Virtual Brain-mind, it would become a Christ-mind or Christ-consciousness, which is a progression and evolution of a Personalised Common Entity Mind. It has a core Design of Christ Instinct, then Christ Will, Christ Justice, Christ Intuition, Christ Crusade, Christ Compassion or Eternal Consideration, and then a Christ Instinct encapsulation. Christ Will is an expression of Desire that is formed by Love-interactive Will and Intellectual Will-agreements. Christ Justice is a Personalised construct of Reason that is formed by Love-interactive or Christ Reason. Christ Intuition is a Personalised construct of Nature that is formed by Love-interactive or Christ Nature. A Christ Crusade is a Personalised Expectation that is formed by Destiny, which is a Love-interactive or Christ Expectation. Christ Compassion is a Personalised construct of Self-awareness that is formed by Unity Awareness or Christ Self-awareness. Christ Instinct is a Personalised construct of Common Logic that is formed by Love-interactive or Christ Logic.

In a more simple state, a Christ Mind would not evolve into a Virtual Brain-mind. It would have a Christ

Logic core, then Christ Will, which gives Consciousness to the Christ Mind, then Christ Reason, Christ Nature, Christ Expectation, which is Destiny, Christ Self-awareness, or Unity Awareness, which is a Self-assessing Self-awareness, and a Christ Logic encapsulation. It would not have the Personalised Reason of Justice, the Personalised Nature of Intuition, the Personalised Expectation of Crusade, the Personalised Self-awareness of Compassion, or the Personalised Common Logic of Instinct. Reason, Nature, Expectation, Self-awareness, and Common Logic would be Unconscious Reflex Responses. The only Conscious Trait would be Christ Will, which would represent an Unconsciously programmed Reflex Responsive Christ Consciousness.

At the moment, possibly most Humans, or possibly all Life forms, are reflections of an Actonic Virtual Brain-mind. A Personalised Common Logic Reality dominated by Will. In this Will-dominated Realty, or Faith-related Dreamstate, evolution is more of a revolution as it goes around in circles and rehashes the same old principles.

Faith is a construct of Will that relies on Trust, which is a Belief-based Feeling that suggests a Personally preferred behaviour. It is a construct of Intellectual Will-agreements suggested by Emotional Belief. Christ Will is a Love-interactive Will of Unconditional Acceptance, not a Will that is suggested by Belief or Personal preference. Faith has proven to be unstable at best, and dissociative or harmful at its worst. An Unconsciously programmed Consciousness of a Christ Mind does not have the Trait of Belief. A Christ-consciousness of an evolving Virtual Brain-mind does.

Were all of the previous so-called Enlightened Beings reflections of a Christ Mind that evolved from a Virtual Brain-mind, which would have been a Christ-mind? More than likely. I say more than likely because from what I have gathered, they all Believed in at least one God. In addition, they all appeared to have Choice, what we would determine to be Free Will, which is a construct of Will suggested by Emotional Belief. As Faith, Free Will progresses to become a suggestion of Belief-based Feeling, or Belief-based Emotional Intelligence, which is Trust.

Where do we go from here? It may not be as a Christ Minded Entity, which has mostly Unconscious states of Mind, but it could be as a Christ-minded BEING, which is a Brain Expressed Intelligent Natural Guise. Those Beings were Renouncing Indiscriminate Sadistic Traits. In that reference, they would be abandoning those Traits, which means they were once reflections of them, or, they were still tempted by them.

There is no real proof that any Being advanced to a level where they could overcome Death or old age deterioration. There are only generationally inherited Beliefs, which are declarations of Personal preference. It is understandable that Humans would rather Believe in those stories, but preferring them to be true does not make them true. In addition, a Belief in reincarnation does not mean anyone overcame Death. It simply means they were capable of accessing experiences from the Mind that may or may not have been experienced by their particular Personality.

We are all connected Unconsciously, even if we are disconnected Consciously. Universal Memories are accessible to any Being that either attracts them Unconsciously through similar Thinking, or Consciously requests them from the Universal Library of Mind. In the grand scheme of things, accepting those Memories to be ours is correct. We are Personalities of the One Mind. However, as one Personality out of an infinite number of Personalities, declaring absolute ownership of them is naïve to say the least.

Crusade

A Crusade is a Personalised Expectation, which is a Personalised Intellectual Tendency Agreement. It is Instinct-based, which is a Personalised Common Logic, or a Personalised Common Sense Agreement. Many Personalities of Mind conducted Crusades. It is a Physical reflection of Belief, and a Personalised Mental Awareness formed by Instinct. In a Personalised Common Logic Reality of Instinct, violence is

quite often inflicted and condoned to fulfil a Crusade. It is a survival Instinct. In addition, a Crusade does not necessarily have a Religious base. However, historical accounts of Crusades have quite often been Religious quests.

A Christ Crusade is conducted with an Attitude that is Renouncing Indiscriminate Sadistic Traits. It is formed by Destiny, which is a Christ Expectation formed by Love-interactive Intellectual Tendency Agreements. Therefore, a Christ Crusade is usually conducted in an attempt to end Sadistic behaviour. However, if Religiously based, sometimes a Crusade conducted to end what is determined to be Sadistic behaviour can become violent. This can quite often be forgiven and sometimes promoted or condoned through the Religious text of the doctrine. Therefore, the initial intention of a state of Mind that wishes no harm to any Being, and seeks not to take advantage of their vulnerable circumstances or conditions, is seemingly nullified. Survival, or an obsessive effort to fulfil a Religious principle, can override the initial quest. This can be the case in nonreligious attempts to end Sadistic behaviour as well. No matter how determined an individual or group is to avoid violence, when it comes to survival, or an obsessive effort to end sadistic behaviour, violence is usually condoned. The initial state of Mind that wishes no harm TO any Being, and seeks not to take advantage of their vulnerable circumstances or conditions, changes to a state of Mind that wishes no harm TO any Being, or FROM any Being. Therefore, to prevent Being harmed, an individual or group may inflict harm through defence. However, a proportionate defence is usually sought. It specifies or prefers a minimal force to achieve that defence.

A Personality of a Christ Mind that is reflecting an Unconsciously programmed or Reflex Responsive Consciousness would not resort to violence because they would not have a Tendency to Crusade, and would not Feel the need for defence in an attempt to survive. In a state of Mind that imagines a need to survive, Personalities that reflect that need are created. An environment that reflects that need is also created. To create an environment other than survivalist, a Mind must Feel safe.

Sadism

As previously stated, CHRIST is an acronym for Cryptic Host Renouncing Indiscriminate Sadistic Traits. What is a Sadistic Trait?

Sadism is a behaviour that seeks pleasure from the suffering of 'others'. It can sometimes go unnoticed in the disguise of normal behaviour. Is predatory behaviour a form of Sadism? In the so-called differentiated animal world, it may not be. However, as a Human animal, it could be regarded as such. Why?

Humans have developed a culture revolving around the pleasure of food. As a predatory Human, a culture revolving around the pleasure of food could be defined as seeking pleasure from the suffering of 'others', not just a behaviour that seeks a food source.

Animals are bred in cruel conditions that are not deemed cruel by the standards of many Humans, simply because they do not regard their food source as Sentient or equally entitled. They are just food. If an animal was Respected enough to fall into the term 'others,' we may then see the association.

In the business of breeding animals for slaughter, we can sometimes regard ourselves as Humane by allowing them certain rights before we slaughter them. Is taking away a Being's freedom regarded as cruel? Could locking 'other' creatures up in confined spaces for prolonged periods before they are slaughtered be regarded as cruel? Could falsely giving an animal a sense of protection, security, and a Humanly defined so called freedom before they are slaughtered be regarded as cruel? Could getting pleasure from the taste of those creatures after they have been locked up in cruel or even so called Humane conditions, and then slaughtered, be regarded as Sadism? I guess it comes down to interpretation and Self-assessment.

Trophy hunters get pleasure from the stalking and killing of animals for sport. They pride themselves on their skill. However, not all trophy hunters kill their prey. They perform what is known as 'catch and

release'. Could the stalking and capturing of an animal for the pleasure of a trophy be regarded as cruel? Could it cause them suffering through the fear of capture? Could the means of capture cause them Physical harm? If animals were regarded as Sentient creatures and given the status of Respect, would killing them or stalking them and capturing them for the pleasure of accumulating and showing them off as trophies be regarded as Sadism? Is it deriving pleasure from the suffering of 'others'? Awareness is an interesting thing!

Destiny

As previously stated, a Crusade is a Personalised, Motive-based, or Belief-based Expectation that is formed by Intellectual Tendency Agreements. It is a Consciously programmed Motivation, which becomes a Subconscious Tendency Agreement. Tendency is formed by Physical Creative Thought and Awareness, a Love-based Agreement of Creative Thought, which is a Love-based Sense Agreement. Destiny is a Love-interactive Expectation that is formed by Intellectual Tendency Agreements. It is a Christ Expectation, which is an Unconscious Tendency Agreement. A Christ Expectation has a Destiny that wishes no harm to any Being, and seeks not to take advantage of their vulnerable circumstances or conditions. It is derived from the Common Sense Agreements of Christ Logic, which is a Love-interactive Common Logic.

When most Humans have inferred a Destiny, it has been with a limited or misguided understanding of the concept. It is sometimes accepted as an Unconscious Tendency, although, quite often with a religious association. Many times, it has been confused with a Crusade that is derived from the Common Sense Agreements of Instinct, which is a Personalised or Motive-based Common Logic. Destiny is not a Consciously Motivated or Belief-based Tendency. It is an Unconscious Tendency. It has nothing to do with Religion, which is Belief-based.

If Destiny is Unconsciously programmed, what part do we play in its programming? Conscious means Motive-based and Personal. Subconscious means Personally or Consciously programmed. Unconscious means having no Personal input.

A Christ Mind has Consciousness through Christ Will. However, Christ Will is Unconsciously programmed Will, which is Unconsciously programmed Consciousness. It is not Subconscious. Therefore, an impersonal Mind must program that Consciousness. Is there an impersonal aspect to Mind that has not been fragmented by Personalities, or, is that impersonal state "Pure Potential", and not Mind?

Pure Potential

Pure Potential is an infinite source of possibilities, or an infinite source of Thoughts. Thought is a response to or an opinion of an Environment. Responses or opinions accumulate to form Memory, which is a Mind Of Registered Yield, or a Mind of Registered Thoughts. Those Registered Thoughts associate to form Traits of Mind, which are designs of Thought with agendas e.g. Creative Thought, which is Imagination, Intellect, Motive, Love, Perception, Morality, Belief, Awareness, Synchronicity, and Identity to name a few.

Traits can associate to form Planar encapsulations and Multiplanar Complexes, which can become Spheres or Entities formed by Emotional/Suggestive/Hypothetical Traits, Mental/Detailed/Theoretical Traits, and Physical/Experimental/Practical Traits. Planar encapsulations can form Sense, which can be focused Emotional, Mental, or Physical Creative Thought, Feeling, which is an expression of Emotional Intellect, Nature, which is an Attitudinal expression of Emotional Intellect, and Logic, which can be an Agreement of Emotional Intellect, an Interpretation of Mental Intellect, and an Application of Physical Intellect. They can also form an infinite number of encapsulated forms other than Sense, Feeling, Nature,

and Logic. Planar encapsulations can associate to form Multiplanar Complexes or Mindstates, which can also associate to form Feeling-based and Nature-based Logical Mindstates.

Logic

LOGIC is a Library Of Growing Intelligent Concepts. It categorises Memory and brings order to the Mind. Intellect is the initiator of that order. It has a Receptive and Constructive agenda.

Creative Logic has a Creative bias. It categorises and brings order to Creative Memory or Imagination.

Common Logic is unbiased. It categorises and brings order to Intellectual Memory. Motive Logic has a

Motivational bias. It categorises and brings order to Motive or Personal Memory. Love Logic and

Awareness Logic has a programming bias. It categorises and brings order to programmed Creative

Memory or programmed Imagination. Moral Logic has a Moral bias, which categorises and brings order

to Moral Memory. Belief Logic has a Belief bias. It categorises and brings order to Belief Memory.

Synchronicity Logic has a Synchronised Creative, Awareness, and Intellect bias. It categorises and brings

order to Synchronised Creative Memory, Synchronised Intellectual Memory, and Synchronised

Awareness Memory. Identity Logic has an Intellect, Motive, and Belief bias. It categorises and brings

order to Identified Intellectual Memory, Identified Motive Memory, and Identified Belief Memory.

As previously stated, Memory is a Mind Of Registered Thoughts. Logical Minds categorise and bring

order to Memory. They can be Unconscious, Subconscious, and Conscious categorisations. A Common

Logic Mind can be Unconscious, Subconscious, and Conscious. An Awareness Mind can be Unconscious

and Subconscious. A Synchronicity Mind can be Unconscious and Subconscious.

In response to our pondering on what part of Mind could program Christ Will, an Unconscious

Synchronicity Mind could fulfil that part. A Synchronicity Mind is a Synchronised Awareness Mind.

However, it is only the Unconscious Synchronicity Mind or Commonality Mind that has a Common

Logic state. An Unconscious Commonality Mind is based on Mutual Respect, which is a Synchronised

Attitudinal Feeling, a Synchronised Respect, or a Synchronised interactive Nature. It has a Synchronised

Tolerance that creates Harmony, which is an interactive Emotional Logic state, a Synchronised interactive

Creative Logic, a Synchronised interactive Common Logic, which is a Physical Logic state, and a

Synchronised interactive Awareness Logic, which is a Physical Logic state formed by Love-based

Creative Logic Agreements. It also has many states of Conscience, which are Mental Logic states. This

Unconscious Logical Mind may keep order in the Labyrinth of the Unconscious Memory Mind.

Subconscious Commonality Mind

A Subconscious Commonality Mind is a Subconscious Synchronicity Mind, which is a Personally or

Consciously programmed Synchronicity Mind. We have already supposed that an Unconscious

Synchronicity Mind could be keeping order in the Unconscious Memory Mind. A Subconscious

Synchronicity Mind may keep order in the Conscious Memory Mind. It has the same Basic Multiplanar

Complexes, but they are Personalised.

The core of the Subconscious Synchronicity Mind is a Personalised creation of Mutual Respect, which is a collaboration of Intuition, Instinct, and Respect. The Emotional Logic aspect is Personalised Harmony, which forms a Synchronised Integration. That Synchronised Integration is a collaboration of Intuition,

Christ-mind Assimilation, which is Personalised Tolerance, and Union. In addition, a Personalised Love-

interactive Creative Logic forms a Synchronised Social or Environmental Conscience. The Personalised

Awareness Logic of the Subconscious Synchronicity Mind forms a Synchronised Virtuality or Virtual

Reality, which is a collaboration of Instinct and Synchronised Awareness Logic. In this instance, the

collaboration of Synchronised Common Logic and Synchronised Nature does not form Instinct and

Intuition. However, it is still a collaborative interaction of Personalised Common Logic and Personalised

Nature. There are also many forms of Personalised Synchronicity Conscience. The Physical or Practical Synchronicity Logic forms a Personalised Commonality or Common Reality.

This Subconscious Synchronicity Mind could be keeping all Virtual Brain-minds in order, which merge some of the Mindstates of the Conscious Belief Mind or Actuality Mind, and some of the Mindstates of the Subconscious Awareness Mind or Virtuality Mind.

Unconscious and Subconscious Awareness Mind

An Awareness Mind is an Unconscious Reflex Responsive Mind with a core design of Respect, which is an Awareness-based Feeling that suggests Awareness-based behaviour. The Emotional Logic of an Unconscious Awareness Mind is Tolerance, which is Awareness-polarised Emotional Logic. Then we have Love-interactive Creative Logic. The Physical Logic of the Unconscious Awareness Mind is Awareness Logic, which is a Love-based Creative Logic Agreement.

A Subconscious Awareness Mind is a Personally or Consciously programmed Awareness Mind. The core of the Subconscious Awareness Mind is the Personalised Respect of Instinctual Respect. The Personalised Emotional Logic of Tolerance becomes Christ-mind Assimilation, which Integrates the Christ Mind into a Virtual Brain-mind. Then we have Personalised Love-interactive Creative Logic, which becomes Social or Environmental Conscience. The Personalised Awareness Logic of the Subconscious Awareness Mind becomes Virtuality or Virtual Reality.

Christ-mind Assimilation

Christ-mind Assimilation Integrates the Christ Mind into a Virtual Brain-mind to become a Christ-mind, which is an evolving Virtual Brain-mind that wishes no harm to any Being, and seeks not to take advantage of their vulnerable circumstances or conditions. The emphasis is on 'wishes' and 'seeks'. It is an Unconsciously programmed Consciousness that is evolving a Virtual Brain-mind, which is an Instinctual Mind. Whereas, a Christ Mind is not Instinctual, it has Christ Logic, which is not a Personalised form of Common Logic. It is an Unconscious Common Logic. I guess we could say that a Christ Mind is Christ Consciousness and a Christ-mind is Christ-consciousness, which would be similar to an apprentice or student learning to become a true reflection of a Christ Mind and therefore expressing a true Christ Consciousness. Consciousness with a big "C" compared to consciousness with a small 'c', and Mind with a big "M" compared to mind with a small 'm'.

Anyone who has gradually changed their way of Life from Carnivorous to Vegetarian has probably been influenced by Christ-mind Assimilation and is now reflecting a Christ-minded Virtual Brain-mind. Any practice that is or has the potential to harm others will gradually phase out as the Christ-mind of Christ-consciousness restructures the Virtual Brain-mind or Instinctual Mind.

Our Consciousness is Being Unconsciously influenced by the Awareness Mind and Synchronised by the Synchronicity Mind. It is something that we have initiated by our way of Thinking, and it was not forced upon us. However, once initiated, its driving force grows stronger. Every now and then, we may rebel against the sometimes-confusing changes, but eventually we get back on track when we realise the benefits of Christ Consciousness.

Vegetarianism may not be the first change from the influence. It could be a change in the way we treat other Humans, but not necessarily a change in the way we treat animals. However, eventually all practices that are not Respectful will phase out. The Awareness-based Feeling of Respect that suggests behaviour from the Awareness Mind evolves into the Synchronised Attitudinal Feeling or Nature of Mutual Respect that suggests behaviour from the Synchronicity Mind.

Christ-minded Virtual Brain-mind

A Christ-minded Virtual Brain-mind is an evolved Virtual Brain-mind that is Being transformed by Christ Mind. It is formed by a core of Christ Instinct, which is the Personalised Common Logic of Instinct Being transformed by the Love-interactive vortex-centred Common Logic of Christ Logic. The next level of the Christ-mind is Christ Will, which is Will Being transformed by Love-interactive Intellectual Will-agreements. Then it has Christ Justice, which is the Personalised Reason of Justice Being transformed by the Love-interactive Reason of Christ Reason. The next level is Christ Intuition, which is the Personalised Nature of Intuition Being transformed by the Love-interactive Nature of Christ Nature. Next, we have a Christ Crusade, which is the Personalised Expectation of Crusade Being transformed by the Love-interactive Expectation or Christ Expectation of Destiny. Now we have Christ Compassion, which is the Personalised Self-awareness of Compassion Being transformed by the Love-interactive Self-awareness of Christ Self-awareness or Unity Awareness, which is a Self-assessing Self-awareness. Last, we have the Christ Instinct encapsulation, which is the Personalised Common Logic of Instinct Being transformed by the Love-interactive vortex-centred Common Sense Agreements or Common Sensory Logic of Christ Logic.

Initially, Mind was Unconscious. It developed Creative Thought or Imagination, and Intellect. From an Agreement of Creative Thought, came Awareness, which is a Reflex Responsive and Unconditional Sense. Intellect became interactive and formed Morality. A collaborative interaction of Creative Thought, Intellect, and Awareness formed Synchronicity. It gradually developed Motive and became Conscious and programmed, which formed a Subconscious or Reflex Responsive Consciousness. Motive became interactive and formed Belief, which is a declaration of Personal Preference or Choice. Choice became interactive and developed Identities, which are a collaborative interaction of Intellect, Motive, and Belief. Identities formed Personalities from Identity-based Attitudinal Feeling, or Identity-interactive Nature, which suggested Identity-based Attitudinal behaviour.

Mind is continually evolving its Personalities, which are its Personal Realities or Personal Dreams. It is also Synchronising those Personal Realities or Personal Dreams to create a Peaceful Environment. Through Pure Potential, those Dreams have infinite possibilities. Recognising the Dream of Mind, or Dream of Life, as our evolution is important if we wish to be Conscious of that evolution. In addition, if we Feel safe within our own Environment, which is a construct of our own Thoughts, Fear will not dissociate the infinite possibilities of us into a state of forgetfulness.

Evolving beyond a Brain

Instinct is a Virtual Brain, and a Virtual Brain-mind is an Instinctual Mind. As we evolve, and are influenced by the Christ Mind, the symbolism of a Brain will no longer manifest in the Dream of Life. A Brain only exists as a reflection of a separation between the Personalities of Mind. When those Personalities reconnect, Mind will be Consciously recognised as a shared Potential, which is a “Pure Potential” with infinite reflections, or a “Cosmic Crystal” with infinite facets.

What will our Physical reflection look like, or, will we still have One? I guess we will be able to call each other Brainless without it being an insult.

Will we still be regarded as Personalities of Mind once we have become part of a Christ Mind?

A Personality, or Personal Reality, has an Identity-based Nature, which is a collaborative interaction of Intellect, Motive, and Belief. It is formed by a collaboration of Faith and Intuition. They are both products of Emotional Belief, which suggests a declaration of Personal Preference or Choice. Christ Will is not formed by Belief. It is formed by Love-interactive Intellectual Will-agreements. All Mindstates of a Christ Mind are Unconsciously programmed. They are not Belief-based, and are no longer Personalities.

What will we BE?

We will be Christ Minded Entities of Mind, not Brain-minded Identities of Mind. A Christ Minded Entity is not a separation or division. It is a Complementary extension of Mind. A Brain-minded Identity reflects a Will for autonomy. A Christ Minded Entity reflects a Will for Unity. As an analogue, I guess we could say that Christ Minded Entities share One Brain, even though it is not a Brain, but a collective Mind of Unified Mindstates.

If we are no longer Personalities, will we still have Choice?

We Choose to be transformed by, and part of, a Christ Mind. It is not forced upon us. By seeking Peace and Unity, we automatically make that Choice, and begin a process of transformation. In that transformation process, we still have Choice. We need to understand that Choice is a Belief, which is a declaration of Personal Preference. Therefore, by seeking Peace and Unity, we declared our Personal Preference. In the transformation process, we determine our own progress. We are not pressured to evolve at anyone else's pace other than our own. It is how focused we are on Peace and Unity that will accelerate the process.

At a certain stage of transformation, Choice becomes redundant. Instead of Being or reflecting a Christ-minded Virtual Brain-mind, which is the transformation process, we will become reflections of a Christ Mind. Our progress is then Unconsciously Motivated toward Unity. Unconscious Guidance will ensure that all Will-based ventures are Synchronised. Therefore, due to our connectedness, no harm will be voluntarily or involuntarily caused.

Life without Gods

Life without Belief will be a Life without superstition and Gods. Therefore, it will be a Life without Religion. That very concept is enough to frighten many Personalities of Mind. It has given meaning to a seemingly purposeless and arduous existence. However, is a Belief, which is only a declaration of Personal preference, more important than Unity?

Has Religion ever United the masses, or has it only formed groups of competitive Believers? A group of Believers that are competing against other groups of Believers is a competition. It is not Unity. Teamwork is only a reflection of Unity when there is only One team, not a number of teams in competition.

Awareness is an Unconditioned or Unconditional Sense, a Conclusive Agreement of Imagination, or a Love-based Sense Agreement. It is a centrally focused impression and expression of Imagination, which creates a Sense of SELF. However, when Awareness is forged into combination with Belief, it becomes programmed by Belief, which means SELF becomes conditioned by Belief. Therefore, a Belief-programmed SELF becomes a reflection of its Choices. If SELF chooses to Believe in a Divine Creator, it becomes a subject of that Belief. If SELF chooses to Believe in a Devil, it becomes a subject of that Belief. Whatever SELF chooses to Believe, it will become a subject of that Belief. To create Unity, Belief must be removed from the equation voluntarily. Through Unity Awareness, which is a Self-assessing Self-awareness, Beliefs can be eliminated from a programmed SELF.

A Christ Mind transforms and extricates SELF from its Brain-minded Beliefs.

Christ SELF

What is a Christ SELF? If Awareness creates a Sense of SELF, and CHRIST infers a state of Mind that wishes no harm to any Being, and seeks not to take advantage of their vulnerable circumstances or conditions, a Christ SELF could be what we become after we cease to be Personalities of Mind.

All Mindstates of a Christ Mind are reflections of Love-interaction. They are also formed within an Unconscious infrastructure. Even Christ Will is Love-interactive. However, there are other structures of Will that are Love-interactive but not Unconsciously influenced. The difference is in the axes of

symmetry.

All Mindstates of a Virtual Brain-mind have Icosahedral axes of symmetry. All Mindstates of a Christ Mind have Octahedral axes of symmetry. Icosahedral axes of symmetry infers that it is a derivative of Will, of which there is Instinct, Intuition, and many other Motive-regulated or Conscious derivatives of the initial Sense of Will, which is an expression of Desire. Octahedral axes of symmetry infers that it is a derivative of Nature, of which there is Common Logic, Self-awareness, and many other Unconscious derivatives of the initial Sense of Nature, which is an expression of Attitude. Therefore, Icosahedral infers that its prime influence revolves around Will, an expression of Motive-based Sense or Desire, which is a Sensory expression of Mental Motivation, and Octahedral infers that its prime influence revolves around Nature, an Attitudinal expression of Feeling, which is a Sensory expression of Emotional Intelligence. In relation to Masculine and Feminine symbology, Will could be romanticised as Masculine, a Physical expression of Mental Motive, and Nature could be romanticised as Feminine, a Physical expression of Emotional Intelligence. In that Sense, a Virtual Brain-mind could reflect a Masculine influence, and a Christ Mind could reflect a Feminine influence. It would not mean that one was just Masculine and the other was just Feminine.

Many so called New-agers are focusing on the Awakening of the Divine Feminine. Their Thoughts more than likely relate to a Christ Mind. However, the Feminine symbolism should not be taken literally. It was probably an archaic symbolism in the Dream of Mind, which became embedded within the Masculine and Feminine Mindstates that have formed through that symbology. No different to any other traditional and habitual Beliefs or Cultures. Recognising the symbology can help to eliminate the separatist Thought forms that have plagued, confused, and fragmented the Mind. There will always be conflict while-ever Beliefs are accepted as truth, and religiously practiced. Rigid Thinking creates Rigid reflections of that Thinking e.g. density, gravity, competition, injury, disease, the need to breathe, eat, drink, sleep, and shelter from the elements etc.

Virtual Reality became Actual Reality and imprisoned the Mind

Virtual can be defined as ‘something that appears to be real but is not real’, or, ‘something that can be Sensed but is not Actual’.

A Virtual Reality is a reflection of Awareness, a centrally focused impression and expression of Imagination, which reflects a Sense of SELF. It is a Love-based Agreement of Creative Thought, an Unconditional or Unconditioned Agreement of Imagination, which is a programmable and Reflex Responsive Sense. However, it is a Planar Sense not a three dimensional Sense. Therefore, it can reflect a Sense of SELF as an Emotional, Mental, and Physical SELF, a Suggestive, Detailed, and Experimental SELF, which is a Hypothetical, Theoretical, and Practical SELF.

Actual can be defined as ‘something that is tangible or accepted to be Real’. An Actual Reality is a reflection of Belief, which is a declaration of Personal preference or Choice. It is an interactive Motive, or an interaction of Personal Thought.

As previously stated, Identity is a collaborative interaction of Intellect, Motive, and Belief. It becomes a declaration of Personal Intelligence. When we Identify with something, we declare it to be familiar or acceptable to our Personal preferences. We can take it on board and build upon it through Intellect or Intelligence, and declare it to be real and ours through Belief or Choice. Individuality is a product of Identity.

Awareness and Belief are contradictions. One is Unconditional Acceptance, and the other is Conditional Acceptance. One gives an Unconditioned Sense of SELF, which infers “I am that I am”, and the other declares conditions and preferences, which infers “I am that I choose to Be”. We need to retain the Awareness of “I am that I am”, which is Pure Potential, while experimenting with the “I am that I choose

to be”, without losing touch with the fact that our Reality is SELF-PERPETUATED.

WE have always been the Supreme Being that we Thought created US. However, a Suggested Belief in the Mind that it was created by a Supernatural Being apart from its own Potential created the Personalised Guidance of Intuition, which is a Personalised or Will-based construct of Nature, a construct of Emotional or Suggestive Belief, and a Personalised Awareness formed by impressions of Desire. A devout Desire to worship that symbol has maintained its validity within the Dream of Life. However, few have recognised the symbolic relationship between Intuition and a GOD, which is an acronym for Guidance Of Divinity. DIVINE is an acronym for Direct Intuition Via Initial Natural Essence, which is “Pure Potential”. “Whatever SELF Chooses to Believe, it will become a subject of that Belief”. “Pure Potential” will become conditioned by that SELF.

The phrase, “What if the Creator forgot that it was the Creator and Thought it was only one of the Creations”, is a paradox in itself. However, if Mind Imagined that it was Created by something other than its own Potential, then through that Suggestion, and in the Dream of Mind, that Suggestion would be Detailed and Experimented with or Practiced.

Awakening from a SELF induced Amnesia

When did Personalities of Mind recognise that they shared One Mind, and that a Brain was a symbolic statement of their declared Individuality that led to a SELF-induced Amnesia?

What would the signs have been within the Dream of Mind? All ways of Thinking are symbolically represented within Life, which is the Dream of Mind. Therefore, there must have been signs.

Were nonreligious Personalities, and nonworshippers of Gods, Conscious reflections of that Awakening?

Were we initially nonbelievers, and then did Believers herald the beginning of Amnesia, or, were there always Believers and nonbelievers?

Was there a time when Personalities could manipulate the Dream of Life Consciously rather than Subconsciously or Unconsciously? There are many stories of miraculous events. Did they hold some truth?

Many cultures have been forgotten or rewritten because of well-meaning Personalities sharing their Beliefs or forcing their Beliefs on others. Did the stories of Gods have some merit, and did the Personalities represented in those stories have extraordinary skills that could control or Consciously influence their Environment? If they were us, what happened to us, and why did we regress to become the way we are?

There are also stories in religious texts of an uprising in the so-called Heavens that brought about our regression. Did they hold some truth as conflicts within the Dream of Mind?

There is a structure of Will called Unity Will. It is formed by Love-interactive Will, but remains Icosahedral or Will-dominated in its axes of symmetry. Within its structure is created an Acton called a Christ Acton with a base design of Mental Love-interactive Creative Thought, and a support design of Infatuation, which is a Personalised construct of Physical Love. It also creates an Instinctual Social Conscience Acton, an Intuitive Obtrusive Photonic Acton, which could be referred to as a symbolic ‘Will of God’ because it has Intuition as its base and support designs, and a Compassionate Union Acton. There is also a structure of Will called Altruistic Will. It is an expression of Mental Belief-interactive Desire. Within its structure is created a Fear Acton, which has a Personal Conscience base design and a Language and Species Differentiation support design. It also creates an Intuitive Obtrusive Photonic Acton. Photonic refers to Photonics or Light. Both represent Will-dominated structures. Together with Faith, which is a Will-dominated structure formed by the Belief-based Feeling of Trust, they are the three possible progressions of Will with Icosahedral axes of symmetry. Within the structure of Faith, an Instinctual Social or Environmental Conscience Acton and a Fear Acton is created, which is a Personal

Conscience-based Language and Species Differentiation Acton.

Our present reality is a Faith-related Dreamstate. It is formed by a construct of Intuition called Intuitive Conspiracy, which is a Conspiracy of Intuitive Inspiration and Intuitive Aspiration.

An Altruistic-related Dreamstate is formed by a construct of Intuition called Social Justice or Intuitive Justice. It has also been referred to as Karmic Justice.

A Unity-related Dreamstate is formed by a construct of Love-interactive Intuition. All three Dreamstates are products of evolved Actonic Virtual Brain-minds. If they once reflected Entities, what would they have looked like, and, what were their abilities? Did the Desires of Will become too dominant and corrupt their Mindstates? Was there a war between two forms of Immortal Beings with the ability to Consciously manipulate the Dream of Life that ended in all Beings becoming Mortal and unable to Consciously manipulate the Dream, or, did only one of those groups become Mortal and relinquish their ability to Consciously manipulate the Dream of Life? I think that may have been the case. We already know how violent and corrupt we can be. Imagine the damage we could do if we had the ability to manipulate the Dream of Life.

Where did all the stories come from? Were those Beings Unconsciously put into a SELF-induced state of Amnesia, or, did the conflict itself inadvertently bring about a SELF-induced state of Amnesia? There is only one way to find out, and that is to remember. To Awaken either for the first time, or once again. If it is once again, we need to tread carefully. We exist within the Dream of Mind. Conflicts within the Mind can Imagine Nightmares.

If Karmic Justice took away our previous abilities, it can return them. Karma is simply cause and effect. Justice is Personalised Reason forming centrally focused impressions of Mental and Physical Desire. Intuition is Personalised Nature and Awareness forming centrally focused impressions of Mental and Physical Desire. Together, they form Social, Intuitive, or Karmic Justice, which is Personalised Empathy forming centrally focused impressions of Belief-interactive Mental and Physical Desire.

Intuition forms a Personal Sense of SELF through Emotional Awareness formed by centrally focused impressions of Desire. Justice does not form a Sense of SELF by its centrally focused impressions of Desire. Can Karmic Justice form a disconnect in that Personal Sense of SELF through the centrally focused impressions of Belief-interactive Mental and Physical Desire? Would that relate to a SELF-induced Amnesia? Was it Belief that induced the Amnesia? If it was, that could explain the SELF-inducement because Belief is a declaration of Personal preference or Choice. By forming a Belief, we inadvertently make a Choice.

In consideration, was it really a war between two races of Immortal Beings, or did it symbolise a conflict within a Mind that developed duality. A conflict caused by a developed Belief that we were created by a God or Gods rather than our own Potential to Think and Dream, and therefore to Imagine the infinite possibilities of SELF within those Dreams.

Duality

“What if the Creator forgot that it was the Creator and Thought it was only one of the Creations”?

Does the term Duality refer to the development of Personalities in a Mind, considering that a Personality refers to a Personal Reality? Is it possible for a Personality to be Aware of its Unconscious SELF and retain its Personality?

It could be said that many examples of Duality have presented themselves in the Dream of Life. However, it is the foundation or fundamental principle that sparked those examples that we are looking for.

To start with, a Dream Body is simply a reflection of a Virtual Brain-mind, which is an Instinctual Mind. Intuition is a fundamental Mindstate of a Virtual Brain-mind. Some may regard Instinct and Intuition as forms of duality. Even Male and Female. In one Sense, that could be true. Spirit and Body may also be

regarded as forms of duality. However, they are only consequences of the fundamental principle. Even a Personality of a Mind could be regarded as a consequence, but not the principle. The fundamental principle is a 'disconnect'.

Difference is not the cause of duality. If we accept that "Pure Potential" is an infinite source of possibilities, or an infinite source of Thoughts or Opinions, difference would be expected. If we accept that Mind is an accumulation and categorisation of those Thoughts or Opinions, difference would be expected. Not accepting those differences to be part of our Potential can cause a 'disconnect'.

Awareness in its fundamental form is an Unconditionally accepted Sense of SELF. A centrally focused impressed and expressed Agreement of Imagination. It is a Love-based Sense Agreement. Any way of Thinking that restricted or contradicted Unconditional acceptance would cause a 'disconnect'.

Respect is Awareness-based Feeling, which suggests Awareness-based behaviour. Tolerance is Awareness-polarised Emotional Logic. Mutual Respect is Synchronised Respect and Synchronised Attitudinal Feeling. Harmony is Synchronised Tolerance.

If a Mindstate did not accept that it was a way of Thinking in a Mind, or a Mind did not accept that it was an accumulation of the Thoughts of "Pure Potential", the consequence would be a 'disconnect'. A Personality, whether Male, Female, or otherwise, is one of an infinite number of ways of Thinking within a Mind of "Pure Potential". The only way to resolve a disconnection is to reconnect.

Initial disturbance of Awareness

"Pure Potential" is an infinite source of possibilities, which is an infinite source of Thoughts. A Mind is an accumulation of the Thoughts or Opinions of "Pure Potential". A Personality is an Identity-based Attitudinal behaviour within or of a Mind of "Pure Potential". Masculine and Feminine Traits are symbolic reflections of Mental and Emotional Thought. Marriage is a symbolic Union of Masculine and Feminine ways of Thinking. Sexual intercourse is a symbolic reflection of a blending of so-called Masculine and Feminine Traits of Mind to create Hybrids of Mental and Emotional Thinking. It is also a determined quest to pass on and evolve Personality Traits, which are Identified Attitudinal behaviours, for Personalities that have pondered and manifested Mortality into the Dream of Mind.

Taking all of that into account, we all came from the same place, which is "Pure Potential". We are evolving Thoughts of "Pure Potential" that have Identified with particular ways of Thinking and behaviour. Therefore, we are all related. This is where it can get a bit uncomfortable. All symbolic reflections of merging, reproducing, and evolving are Dreams within the Mind of "Pure Potential". However, because of the 'disconnect', Personalities formed Moral behaviour or codes of conduct in an attempt to bring order to the Dream of Life. If we are Personalities of the One Mind, symbolic sexual reproduction could be regarded as incestuous due to the Moral standards developed by those disconnected Personalities. Embracing a reconnection would shatter the Beliefs of those disconnected Personalities and cause a Moral dilemma. In essence, we are all brothers and sisters.

Now to God worship. If we accept that we are Personalities of a Mind of Pure Potential, and we embrace the fact that WE created all environments by our differing and conflicting ways of Thinking, a devout worship of a Supreme Being that we Believed created everything would not only be questioned, but also rationally negated.

We already know that change is determined by our willingness to abandon the status quo. Accepting our true inheritance, would for some, thrust the Brain-mind into a catastrophic meltdown. Therefore, voluntary ignorance can be a means of survival for many rigid, traditional, or habitual Thinkers. Comfort Zones can be Belief-based sanctuaries for Personalities that have spent a Lifetime developing or following standards and codes of conduct. For the Religious or God worshippers, to embrace the Awareness of Oneness would mean heresy, and therefore demand retribution. For some, Fear of the

unknown can be worse than Fear of the Known. Letting go the fantasies of Belief that have helped us deal with our lack of Awareness can be daunting. However, embracing the Awareness that can explain those fantasised Beliefs is liberating to say the least.

Liberation

Liberation can be defined as being 'set free'. Therefore, it infers that something or someone was being held against their Will, or, that they were confined by certain restrictions. Could Humanity claim to be held against their Will? For groups of Humans being held captive by other groups of Humans, that would be true. However, for Humanity as a species, that probably is not true. It is more likely to be a collective, shared, or Common Will that is confining or restricting them, and, it is more likely to be a Will that has been incorrectly regarded as fundamental to achieving their purpose. In essence, it would be a voluntary incarceration.

Belief is a declaration of Personal preference or Choice. A Will formed by Belief expresses the Desires of Personal preference or Choice. Faith expresses the Desires of Emotional Choice, and Altruistic Will expresses the Desires of Mental Choice. There is no construct of Will that expresses the Desires of Physical Choice. At least not directly. However, Contentment is a Will-regulated structure formed by or forming a collaboration of Physical Intellect, Love, and Belief, which is a Physical Choice. A Crusade is a Will-regulated structure formed by or forming Physical Belief, which is a Physical Choice. Intuitive Conspiracy is a Will-regulated Intuitive structure formed by or forming Physical Belief, which is a Physical Choice. Because of Intuition, this structure is an Emotional Choice that suggests a Physical Choice. There are probably many others, but the ones stated are responsible for much of the Human condition, in relation to voluntary incarceration, that expresses the Desires of Emotional, Mental, and Physical Choices.

Liberating the Human condition involves recognition of and accepting responsibility for our Choices. Our Beliefs, which are declarations of Personal preferences, are those Choices. To be Liberated, we must liberate our Awareness, which is our Sense of SELF, from those Beliefs.

Sense of SELF

A Sense of SELF is not Self-awareness. It is Awareness. Self-awareness is an Unconscious Emotional Sense of SELF impressed and suggested by Attitude and Common Sense, and forms an Agreement of Emotional Logic. If Self-awareness is Personalised, it becomes a Subconscious Emotional Sense of SELF impressed and suggested by Attitude and Common Sense, and forms an Agreement of Compassion. Intuition is a Personalised and Subconscious Emotional Sense of SELF impressed and suggested by Desire, and expressed as Personalised Nature.

A Mental Sense of SELF, Details as a Sense Agreement of Common Logic, which is a Common Sense Agreement. A Personalised Mental Sense of SELF, Details as a Sense Agreement of Instinct, which is a Personalised Common Logic formed by Personalised Common Sense Agreements. A Physical Sense of SELF, Experiments and Applies as a Sense Agreement of Common Logic, which forms by Common Sense Agreements. A Personalised Physical Sense of SELF, Experiments and Applies as a Sense Agreement of Instinct, which is a Personalised Common Logic formed by Personalised Common Sense Agreements.

We need to be very careful what Impresses, Suggests, and forms Agreements of, what Details and Interprets, and what is Experimented and Applied as a Sense of SELF.

SPACE

SPACE is an acronym for Sentient Plasma Attributing Conjugated Entities.

Sentient means having Sense and Feeling.

PLASMA is an acronym for Polymeric Lattice Actively Simulating Mass Aggregation.

POLY is an acronym for Potential Of Life Yield. MERIC is an acronym for Maximised Entity Regulation In Contrast.

In dictionary terms, Poly means ‘many’ and Meric means ‘consisting of parts’. Polymeric means consisting of many parts. A Lattice is a framework or Matrix.

A Polymeric Lattice is a Matrix of many parts. Regarding Space, it is a Sentient Matrix of many Thoughts or Opinions.

SPHERE is an acronym for Sentient Plasma, or Sovereign Portent, Heraldng Entity Recognition Exaltation. Spheres are created in Space. They are Entities of “Pure Potential”, and they are Sentient. “Pure Potential” is an infinite source of possibilities, an infinite source of Thoughts, which are Opinions. Space represents “Pure Potential”. Everything that manifests within Space is an expression of that Potential. It is “Pure Potential” Thinking and accumulating Thoughts or Opinions to create a Mind; a Universal Mind of Evolving Thoughts or Opinions; a Sentient Plasma. “Pure Potential” is Unconsciously creating, experiencing, responding to, and evolving infinite Opinions of SELF, and regarding Personalities, infinite Opinions of a Personalised or Conscious SELF.

Cosmos

COSMOS is an acronym for Creative Opinion Scientifically Manifested Omnipotent/Omniscient System.

COSMIC is an acronym for Creative Opinion Scientifically Manifested Instructional Collaboration.

UNIVERSE or UNIVERSAL is an acronym for United National Inverse Variables Expressively Registered Systematic Evolution or Systematic Advances Legitimised.

Creative Opinion means Imagination or Creative Thought. Scientifically means Systematically, Methodically, or Logically. Omnipotent means all-powerful. Omniscient means all knowing.

Cosmos or Cosmic represents a Universal Mind, an ordered System of Memory, or a Mind of “Pure Potential”.

Is “Pure Potential” and Mind the same thing? MIND is an acronym for Mediative Instructional Nature Delegation. “Pure Potential” Thinks, accumulates and categorises Thoughts or Opinions, and evolves. It is “MIND”; a Thinking, Sensing, Feeling, Logical, and Evolving Potential; an infinite source of Thoughts or Opinions; Sentient Plasma Attributing Conjugated Entities.

Environment

Thought is a response to or an Opinion of an Environment, which can be defined as ‘surroundings’ or ‘circumstances and conditions’. If Mind is responding to an Environment with Thoughts or Opinions, what is the initial Environment? Would that Environment be Mind itself? Is Mind a response, rather than an Environment? Could “Pure Potential” be regarded as the initial Environment? If so, Mind could be a response to “Pure Potential”. Therefore, Mind would be initial Thought. If Thought were the Potential to Think, then Thoughts would be responses to or Opinions of that Potential to Think. Taking all of that into account, Thought would be the Environment as well as the responses to or Opinions of that Environment. Therefore, Thought would be “Pure Potential” and Mind, or, “Pure Potential” and Mind would be Thought. The old saying, “what came first, the chicken or the egg”, would be simplified by realising that Thought is all there is. It is the Potential, the Environment, and the Opinion.

In Geometrical Thought Harmonics, which is a Language of Thought, a Point is a Thought or Opinion, a Line between Points is the direction that Thought takes, an angle between Points is an agenda, a Polygon

is a design of Thought or Trait, a polygonal plane of a Geometric Sphere determines the level of Thought, which would be Emotional, Mental, or Physical Thought, and the Planar Sphere becomes an Entity or Mindstate. The essence is Thought, and the product is a state of Thought.

THOUGHT

THOUGHT is an acronym for Torrid Heart Of Unity Guided Harmonic Transmission. As previously stated, it is a Mind of “Pure Potential”.

A Harmonic is a progression of a fundamental Tone or Frequency. Thought Harmonics is a progression of Thought, which forms Thoughts or Opinions. Geometrical Thought Harmonics is an ordered structure of Thoughts or Opinions that forms Traits and Mindstates. However, Geometry is defined as ‘earth measurement’. It is used to calculate, construct, and navigate. Therefore, Geometrical Thought Harmonics is used to calculate, construct, and navigate progressions of Thought. I guess we could call it a workshop manual for Mind. However, it is regularly rewritten because Mind evolves, and so does our understanding of Mind.

Thought is an infinite Potential to form Thoughts or Opinions. Those Opinions can be complementary and contradictory, explanatory and confusing, Personal and impersonal, or Conscious and Unconscious. They can be Creative, Receptive and Constructive, Motivational, Unconditional, Suggestive, Detailed, and Experimental. They can be grounding, uplifting, enlightening, or they can be destabilising and disturbing.

If we accept them Unconditionally, they are just an accumulation of Opinions that form an Unconscious Reflex Responsive Memory, which is a Mind of Registered Thoughts or Opinions. If they are Intellectualised, they can be categorised and built upon to form an Unconscious Logical Memory. If they are Intellectually programmed, they can form an Unconscious Reflex Responsive Logical Memory. If they are Personalised, they can form a Conscious Memory. If they are Personally Intellectualised, they can form a Conscious Logical Memory. If they are Personally programmed, they can form a Subconscious or Reflex Responsive Memory. If they are Personally and Intellectually programmed, they can form a Subconscious Reflex Responsive Logical Memory. There are an infinite number of ways that Thoughts, Memory, or Mind can develop and evolve. However, THOUGHT is the Potential, which is an infinite source of possible Opinions.

Thoughts are reflections of THOUGHT. It is THOUGHT reflecting upon its SELF.

Changing the Matrix

Thought is Sentient Plasma, and Thoughts are reflections of Sentient Plasma, which are Responses or Opinions of Thought. They form a Matrix of Thoughts as a Virtualisation of Responses or Opinions, which is a Sense of SELF called Awareness; a Sentient Expressed and Experienced Life Form, or a centrally focused impression and expression of Imagination.

Through Imagination, Awareness creates impressions and expressions of SELF. A Sense of SELF expands as more Responses or Opinions emerge from the Pure Potential of Thought.

Our Sense of SELF got lost in the Mirror Maze of Imagination. We Imagined infinite possibilities of a SELF that became Personalised. From that Personalisation, we formed disconnects within the Pure Potential of Thought. Dissociation created competition and Fear. It also formed Personal Memories or Personal Minds that became Consciously partitioned Selves within the Unconscious Potential of SELF. Consciously partitioned Selves formed Virtual Brain-minds as reflections of dissociation. Through competitive ignorance, expressions of Will created Thought Viruses, which reflected conflict and instilled Fear. Sentient Plasma, symbolically represented by Space, became a void that reflected isolation. We Imagined a need to be protected and sustained, and therefore, we created those reflections within a Will-

dominated Dreamstate.

Consciously partitioned Selves imagined Gods from the Unconscious Potential of SELF. Initially, those Gods were reflections of Fear due to the isolation and confusion that Imagined them. Worship and sacrifice was Imagined to appease those Gods. However, the more we worshipped and sacrificed the more disconnected and subjugated we became. We then began looking for someone or something to blame for our violent and opportunistic behaviour, and the violent behaviour of our Environment. Demons were Imagined as the cause, and they have retained their hold on the Consciousness of Humanity. We then Imagined wars between Gods and Demons that were reflected through our own Nature. Wars continue to be reflections of Gods against Demons, or behaviours that have been associated with or influenced by those Imagined Demons. Unfortunately, both Imagined Gods and Imagined Demons instilled Fear into their subjects. If catastrophes occurred within the Environment, we Imagined that we either upset the Gods, or that the Demons were to blame. We did not realise that catastrophes were reflections of Fear and dissociation within the Pure Potential of Thought. Deterioration and Death have become accepted normalities within the realm of dissociation and Fear.

It does not have to be like this. All efforts to reconnect with and accept our Pure Potential will alter the Matrix of SELF, just as our dissociation from Pure Potential has altered the Matrix of SELF.

Atmosphere

ATMOSPHERE is an acronym for Attitudinally Transformed Mind Of Sentient Plasma Heraldng Entity Recognition Exaltation. It reflects the Mood of a Sentient Entity. AURA is an acronym for Attitudinally Unified Radiated Atmosphere.

Nature is an Attitudinal expression of Feeling, a Sensory expression of Emotional Intelligence, which suggests Attitudinal behaviour. ATTITUDE is an acronym for Acquired Thought Transmission Initiating Traits Under Direct Expression. It is Intellect-based Sense. Intellect has a Receptive and Constructive agenda. It takes on board and builds upon concepts. Regarding Nature, it is a Sentient expression that is open to suggestion, accessible through suggestion, and able to be built upon by suggestion. Nature creates Atmosphere. A change in Nature causes a change of Atmosphere.

Intuition is a Personalised Sentient expression that is open to the suggestion of Belief and Personalised Awareness, accessible through the suggestion of Belief and Personalised Awareness, and able to be built upon by the suggestion of Belief and Personalised Awareness. It is an Attitudinally Transformed Subconscious or Personally programmed SELF. All Personalities are Subconsciously connected through Intuition. They are Identified Selves of Intuitive Will. A change in Intuitive Will causes a change in an Identified SELF, which causes a change in a Personal AURA, and in turn, a change in an Environmental Atmosphere.

When a Conscious or Personal SELF reconnects with the Unconscious and impersonal SELF, all Personal Selves are affected because they are Personalised reflections of the same SELF.

Mirror Maze

We need to remember that there is no US and THEM. We created everything. EVERYTHING!

Smashing a mirror in a mirror maze does not destroy the source of the reflection. It simply denies a point of view. All reflections come from the same source. If the mirror is flawed, the reflection will be distorted.

In the Dream of Life, a way of Thinking creates a mirror. That way of Thinking will determine the quality of the reflection. If we do not like the reflection, we should change that way of Thinking.

Our Environment is a mirror maze, showing the many different points of view of the same SELF.

Destroying a mirror will not destroy that SELF. It will simply create another mirror until we recognise the

source of that reflection. It has always been US, and will always BE US. The "Pure Potential" of THOUGHT.

Conscious and Unconscious: Personal and Impersonal

Conscious means Motive-based and Personal. Unconscious means having no Personal input. Therefore, it is Impersonal, which is neutral. Subconscious means Personally programmed, which is a Personal Reflex Response. Is it possible for Consciousness to be neutral?

Unconsciousness has Awareness, which is a centrally focused impression and expression of Imagination. In essence, Awareness is Neutral, which is unconditional. Neutral can mean neither for nor against, a balance of positive and negative attributes, or having a Mediative function. Is an Unconscious Sense of SELF, or an Unconscious Awareness, Mediative? It is an Unconditional Agreement of focused Creative Thought, which is an Unconditional Sense. A Sense that Unconditionally labels, recognises, and recalls Memory.

The Pure Potential of Thought could be regarded as Neutral. It has the Potential to manifest positive and negative opinions, but in essence, it is a neutral state of Thought. It could be regarded as Unconscious. However, Unconsciousness can relate to Imagination, Intellect, Perception, and all progressions of those Traits that are not Motive-based. Therefore, it can have Nature, Self-awareness, Passion, Common Sense, Reason, Empathy, and all progressions of those attributes that are not Motive-based. Pure Potential, even though regarded as Neutral and Unconscious, could manifest Motive-based Thoughts or Opinions, which could be regarded as Consciousness. Therefore, the Pure Potential of Thought could form Impersonal and Personal opinions that could be regarded as the Unconsciousness and Consciousness of SELF. Taking all of that into account, there would only be One source or SELF that could be both Unconscious and Conscious, or Impersonal and Personal. No different to what we regard as US having Personal and Impersonal opinions. It is still the same SELF, sometimes Being neutral and other times Being positive or negative, or, sometimes Unconsciously responding to an Environment and other times Consciously responding.

All versions of SELF within the Dream of Mind, which we have determined to be Life, are those Personal/Conscious/Actual and Impersonal/Unconscious/Virtual reflections.

Platonic symbolism

Platonic solids were proposed by Plato. They are Geometric structures that were assumed to symbolise Elements of Creation. A Tetrahedron was assumed to represent **FIRE**. A Cube was assumed to represent **EARTH**. An Octahedron was assumed to represent **AIR**. An Icosahedron was assumed to represent **WATER**. A Dodecahedron was assumed to represent **ETHER**, or, in some circles, **GAIA**. How were those assumptions reached?

A Tetrahedron is a structure of four Equilateral Triangles that form a Pyramid. In Geometrical Thought Harmonics, which is the Language of Thought, an Equilateral Triangle represents the Creative Thought of Imagination. The Tetrahedron is proposed to be unbiased because it does not have a different polygonal base to its sides. It is a Pure expression of Imagination or Creative Thought, which is proposed to represent Common Sense. Sense is proposed to be focused Creative Thought, or focused Imagination. An unbiased expression of Sense is labelled as Common. The symbolic reference of **FIRE** would be replaced by a Pure expression of Imagination or Creative Thought, which is proposed to represent Common Sense – **Form In Raw Expression**. Regarding Masculine and Feminine traits, a Tetrahedron has only Physical Planes. Therefore, it would not be regarded as Masculine or Feminine. It would be Neutral.

A Cube is a structure of six Squares that form a Hexahedron. In Geometrical Thought Harmonics, a Square represents Intellect. External Polygonal facets or Planes represent Physical or Practical Planes.

The Cube becomes a construct of Pure Physical or Practical Intellect, which has been proposed to represent Common Logic. Logic is a Library Of Growing Intelligent Concepts.

The internal structure of a Cube is formed by two interconnected Tetrahedrons of Common Sense. They form a Common Sense Agreement because the edges of the Tetrahedrons form the diagonals of the six external Squares of a Cube. Each external point of the Squares of the Cube is at an equal distance from the centre of the intersecting edges of the Tetrahedrons. This is proposed to represent an Agreement of Common Sense, or a Common Sense Agreement. The internal Equilateral Triangle facets of the Tetrahedrons form Mental Imagination because internal Polygonal Planes of a Geometric Sphere other than centre dissecting are proposed to represent Mental Planes. The centre-points of the six Squares of Intellect form the points of an Octahedron, which becomes the Agreement that is formed by Common Sense. The symbolic reference of **EARTH** would be replaced by a construct of Pure Physical Intellect, which has been proposed to represent Common Logic. However, the external Physical Intellect Planes of Common Logic are formed by the points of the internal Mental Equilateral Triangle Planes of a Common Sense Agreement, which becomes Common Sensory Logic – **Experience And Restricted Thought Harmonics**. In essence, the initial Cube would have no Masculine or Feminine traits. It would be Neutral. However, the internal structure of the Cube has Mental Equilateral Triangle Planes of Imagination, which would make it Masculine.

An Octahedron is a structure of eight Equilateral Triangles of Physical Imagination that forms six internal or centre-dissecting Squares of Intellect. A centre-dissecting Polygonal Plane within a Geometric Sphere represents Emotion. The six Squares of Emotional Intellect within the Octahedron form an expression of Feeling. The Equilateral Triangles of Physical Imagination create Square-based Pyramids. A Square-based Pyramid represents Intellect-based Sense, which represents Attitude. An Octahedron becomes an Attitudinal expression of Emotional Intelligence, which represents Nature. Nature becomes an Agreement formed by Common Sensory Logic. The symbolic reference of **AIR** would be replaced by an Attitudinal expression of Emotional Intelligence, which has been proposed to represent Nature – **Attitude In Resonance**.

In reference to a Cube of Common Logic, an Octahedron would initiate the Common Sense Agreement of Common Sensory Logic. Therefore, the internal structure of a Cube of Common Logic would create the Emotional Intellect Planes of Attitudinal Feeling, which is Nature. A Cube of Common Sensory Logic would have Mental and Emotional Planes, and therefore, it would have Masculine and Feminine traits. However, Common Sensory Logic would be Suggested by the Emotional Intellect that forms Feeling. It would have a Feminine Suggestibility. In Geometrical Thought Harmonics, this would form a Common Logic-mind Suggested by the Attitudinal Feeling of Nature.

A Dodecahedron is a structure of 12 Pentagons of Physical Motive or Personal Thought, which would form Pure Physical Motivation. Internally, it is formed by 5 Cubes of Common Logic, which forms 10 Tetrahedrons of Common Sense or 5 Common Sense Agreements. Therefore, a Dodecahedron represents Personalised Common Sensory Logic, which is proposed to represent Instinct or the Virtual Brain.

Why would a Dodecahedron symbolise GAIA? Gaia is supposed to represent the Personification of EARTH as a Living Entity. In Greek Mythology, it was supposed to be the Goddess of Earth, which would be Feminine. A Cube was symbolised as EARTH, which is proposed to represent Common Sensory Logic. Personalised Common Sensory Logic is proposed to represent Instinct. The Common Sensory Logic that forms the internal structure of Instinct would create the Personalised Nature of Intuition, which is Suggested by Emotional Belief, Emotional Awareness, and Emotional Intellect. Therefore, Instinct would be Suggested by the so-called Feminine traits of Intuition. The Personalised Common Sensory Logic of Instinct would form an Instinctual or Personalised Common Logic-mind

Suggested by Intuition.

A Dodecahedron was also proposed to represent ETHER, which is proposed to be a hypothetical medium that fills all space. Was the Dodecahedron assumed to represent Mind?

An Icosahedron is a structure of 20 Equilateral Triangles of Physical Imagination that forms 12 Mental Pentagon Planes of Motive or Personal Thought. The Mental Pentagon Planes of Motive become bases for Pentagonal Pyramids. A Pentagonal Pyramid represents Desire, which is a Wish. An Icosahedron also forms internal Equilateral Triangles of Mental Imagination. It becomes a Physically and Mentally Creative expression of Mental Motivation, which is an expression of Mental Desire. The symbolic reference of WATER would be replaced by a Physically and Mentally Creative expression of Mental Motivation, which is proposed to represent **WILL – Wish Instructed Latent Living**, or Wish Instructed Potential.

Previously, the acronym of **WATER** was proposed to be **Wisdom And Thought Expressed Radiance**. Water is supposed to be a requirement for Life. If Water symbolises **WILL**, then **WILL** would be a requirement for Life. In Geometrical Thought Harmonics, **WILL** is proposed to be **SPIRIT – Sentient Plasma Initiating Radiant Intuitive Thought**.

Spiritual Ancestry

In 3D Geometry, all Icosahedral structures are recognised as truncations (or derivatives) of the Icosahedron. Therefore, in Geometrical Thought Harmonics, they would be derivatives of **WILL** or **SPIRIT**.

An Icosidodecahedron is a derivative of the Icosahedron. In Geometrical Thought Harmonics, it represents Intuition. Therefore, Intuition would be a derivative of **WILL** or **SPIRIT**. Instinct, or the Virtual Brain, would also be a derivative of **WILL** or **SPIRIT**.

Regarding truncation, an Octahedron of Nature would be a derivative of a Cube of Common Logic. Therefore, all aspects of a Common Logic-mind would be derivatives of Common Logic. This would include the Cuboctahedron that represents Self-awareness. This theory seems to be practiced through Molecular Geometry. Is it practiced through the Language of Thought, which is Geometrical Thought Harmonics? In essence, all of the Platonic symbols would be derivatives of **WILL** or **SPIRIT**; the Tetrahedron of Common Sense, the Octahedron of Nature, the Cube of Common Logic, and the Dodecahedron of Instinct.

Intuition is a Personalised construct of Nature. Instinct is a Personalised construct of Common Sense and Common Logic. Compassion is a Personalised construct of Self-awareness. Justice is a Personalised construct of Reason. Social Justice is a Personalised construct of Empathy, which is a collaboration of Nature and Reason in the form of Intuitive Justice.

Does an Icosahedron of **WILL** or **SPIRIT** symbolise Pure Potential; a Physically and Mentally Creative expression of Mental Motivation; Wish Instructed Potential, or, Sentient Plasma Initiating Radiant Intuitive Thought?

Does an Icosidodecahedron of Intuition symbolise **GOD – Guidance Of Divinity**, which is Guidance of Intuition? **DIVINITY** is Direct Intuition Via Initial Nature In Total Yield. If so, does it Guide the Personalised Dreams of Mind through Suggestive Intelligence, Suggestive Awareness, and Suggestive Belief?

Does a Dodecahedron of Instinct symbolise the Virtual Brain, which is a Body Related Active Intelligent Nemesis? Virtual means 'an apparent or simulated reality that is not actual'. Does the Virtual Brain of Instinct form Common Logic Realities within the Personalised Dreams of Mind? Is this the cause of Self-perpetuating Dreamstates?

Does WILL, or SPIRIT, which is an expression of Desire, Actualise the Personalised Dreams of Mind? Is it the infinite source of possibilities that is proposed as Pure Potential, which has evolved into a Self-perpetuating Personal Potential?

Spiritualism

What is Spiritualism?

Mind is an accumulation and categorisation of Thoughts. It is a Logical construct initiated by Feeling. Logic is a Library Of Growing Intelligent Concepts. Feeling is an expression of Emotional Intelligence. Emotion is Suggestive. Feeling Suggests Behaviour. Therefore, Mind is a Library of Behaviour, or, a construct of Behavioural Logic.

In the Geometry of Mind, or the Language of Thought, Spirit has been realised to be Will. It is a Physically Creative expression of Mental Motive, which is an expression of Desire. Desire is Motive-based Sense, which is a Wish. Sense is focused Creative Thought, which is focused Imagination. When we say that someone or some creature is very Spirited, it means that they have a strong Will; a strong expression of Desire, or expression of Wishes.

In dictionary terms, an 'ism' can relate to a distinctive practice, system, philosophy, political ideology, or artistic movement. In light of that information, Spiritualism is simply a distinctive practice, system, philosophy, political ideology, or artistic movement of Will. Humans have regarded the term Spirit to be something more Ethereal. It simply expresses the Wishes of the Conscious Mind.

In the Language of Thought, the term GOD, which is Guidance Of Divinity, relates to Intuition. DIVINE means Direct Intuition Via Initial Natural Essence. It is Intuitive Guidance.

Intuition is a product of Personalised Awareness Suggested by impressions of Desire. It is also an expression of Personalised Nature, which is Personalised Attitudinal Behaviour. Attitude is the position of a Body in space, which is the position a Body takes in relation to an environment. Therefore, Intuition Suggests Personalised Awareness created by the impressed Wishes of the Conscious Mind. It also Suggests Attitudinal Behaviour and Choices. It has Physical, Mental, and Emotional Creativity, Physical, Mental, and Emotional Motivation, and Emotional Intelligence. Humans have regarded the term GOD to signify a supernatural Entity. It is simply the Intuitive or Subconscious Guidance of the Conscious Mind. We are ALL Personalities of that Mind.

Following religions that have misconstrued the aspects of our own Mind and indoctrinated their followers into a Mindstate of voluntary slavery and God-worship, is disrespectful to the SELF.

In the Language of Thought, Instinct is the Virtual Brain. The Instinctive Mind is the Brain-mind. Instinct is a product of Personalised Common Logic, or Personalised Common Sense Agreements. Intuition expresses the Personalised Attitudinal Behaviour that initiates or Suggests the Behavioural Logic of the Instinctive Mind. Will expresses the Wishes or Desires of the Instinctive Mind or Brain-mind. A Brain-mind relates to the Body. BRAIN means Body Related Active Intelligent Nemesis. Nemesis relates to cause and effect. Body is a reflection of Mind; Being Of Direct Yield.

Self-perpetuating Personal Potential

Self-perpetuating means to propagate or continue without external intervention. Personal means private or independent. Potential means possibility. Self-perpetuating Personal Potential means independently inherent possibilities, or autonomous Potential.

Desire is Personal Sense, which labels, recognises, and recalls Personal Memory. An Impression of Desire would Imprint Personal Memory. Therefore, Intuition Imprints Personal Memory. An Expression of Desire would Manifest Personal Memory. Therefore, WILL or SPIRIT would Manifest or Actualise

Personal Memory. Personal Memory is independent and Motive-based. Personalised Memory is modified to suit Personal preferences.

Instinct, or the Virtual Brain, is a construct of Personalised Common Logic that stores and categorises Personalised Attitudinal and Common Memory. WILL or SPIRIT expresses Motive-based Memory. Intuition Suggests and Imprints Personal Memory, and expresses Personalised Attitudinal behavioural Memory.

Personality, or Personal Reality, is an expression of Emotional Identity-based Attitudinal behavioural Memory. Emotional Identity is Suggestive through an interaction of Intellect, Motive, and Belief. Attitudinal behaviour is Suggested by Emotional Intelligence. Personality is formed through a collaboration of Intuition and Faith, which is Trust-based Will. Trust is an expression of Emotional Belief-based Emotional Intelligence.

Is Personality, or Personal Reality, a Self-perpetuating Dreamstate? Are Dreamstates reflections of Desire, which are Wishes? Are Wishes requests? Intuition internalises or forms impressions of Desire that create Intuitive Awareness. Will externalises or creates expressions of Desire. Through a collaboration of Intuition and Faith, the Identified Attitudinal behaviour of Personality, or Personal Reality, is formed by the impressed requests of Intuitive Awareness and the expressed requests of Trust-based Will, which is Faith.

Does Intuition make requests of Pure Potential, and, does Will express or Actualise those requests? If so, the access to Pure Potential through Personality would be determined by the Emotional/Suggestive Beliefs Identified, Emotional/Suggestive Intelligence, and Emotional/Suggestive Awareness that formed the Personality or Personal Reality, which is a Self-perpetuating Personal Potential.

Have Life forms up until now evolved or Self-perpetuated through Personality changes? If so, is there another way?

Mutual Respect-based Evolution

Mutual Respect is an expression of Emotional Synchronicity-based Attitudinal Feeling or behaviour. Attitudinal Feeling or behaviour is an Attitudinal expression of Emotional Intelligence, which is Nature. Emotional Synchronicity is Suggestive through an interaction of Imagination, Intellect, and Awareness, which is a Love-based Sense Agreement, a Conclusive Agreement of focused Imagination, or an experience-expression of focused Imagination.

Mutual Respect is created through a collaboration of Intuition and Instinctual Respect. Respect is an expression of Emotional Awareness-based Emotional Intelligence. The Instinctual Awareness of Respect-based Instinct merges with Intuitive Awareness to create the Synchronised Awareness that Suggests the Synchronised Attitudinal Feeling or Nature of Mutual Respect. Instead of Nature evolving through Identity-interactive Attitudinal Feeling or behaviour, it would evolve through Synchronicity-interactive Attitudinal Feeling or behaviour, which is Synchronicity-interactive Nature rather than Identity-interactive Nature. In other words, the Attitudinal Feeling or Attitudinal behaviour of Nature would evolve through Synchronicity rather than Identity.

MEDIATION

In dictionary terms, 'mediation' is commonly inferred to mean 'intervention' in a dispute.

In Geometrical Thought Harmonics, Mediation is the interaction of a third party. An example would be three points of Thought collaborating to form a Mediative design of Thought. It is not that only one of those points becomes a Mediator. The interconnectivity of three points of Thought prevents opposing Thought. This is Mediation, which is to prevent opposing Thought. Some examples of Creative Mediation are Imagination, Love, Awareness, Forgiveness, and Synchronicity. Love, Forgiveness, and

Synchronicity are forms of interactive Creative Mediation. In Geometrical Thought Harmonics, Love can be an interaction of two overlapping Equilateral triangles of Imagination. Forgiveness can be an interaction of three overlapping Equilateral triangles of Imagination, and Synchronicity can be an interaction of four overlapping Equilateral triangles of Imagination. Synchronicity can also be an interaction of three overlapping Squares of Intellect, which form an Intellectually influenced Creative Mediation.

Both Love and Synchronicity can allow opposing Thoughts even though they are Mediators i.e. Love is represented by a Hexagon, which can have opposing sides and points, and Synchronicity is represented by a Dodecagon, which can have opposing sides and points. However, if the Hexagon becomes a Hexagram and the Dodecagon becomes a Dodecagram, they have no opposing sides or points because they can form separate but overlapping Equilateral triangles. An Equilateral triangle that represents Imagination does not have opposing sides and points, and, a Nonagon that represents Forgiveness does not have opposing sides and points.

In Geometrical Thought Harmonics, a Point represents an Opinion and a side represents a line of Thought, or the direction that Thought takes, which is a way of Thinking. Therefore, not having opposing sides and Points means that there are no opposing Opinions or ways of Thinking.

A Grammic design represents something written or recorded, a message, or an Interpretation e.g. a Hexagram represents a Creative Interpretation or an Interpretation of Imagination. However, Synchronicity, even though it can be an interaction of overlapping Equilateral triangles of Imagination, and therefore a Creative mediation, and an interaction of overlapping Squares of Intellect, which is an Intellectual mediation, can form Interpretations that internally connect all points without forming any interactive polygons or Traits other than the Dodecagram of Synchronicity. Therefore, it would not mediate through its interactive Imagination or Intellect. In addition, it would not interact through its Imagination, Intellect, Love, or Awareness.

In Geometrical Thought Harmonics, the Creative Thought of Imagination is represented by an Equilateral Triangle, which has three points of Thought equidistantly connected to one other. If the Triangle was not Equilateral, one or two of the angles could create dominant agendas, as with an isosceles triangle.

The acronym of POINT is a Precise Opinion In Naïve Terminology, which simply means that Thought is a Precise Opinion i.e. when someone says, ‘get to the Point’.

Agendas are formed by the angles. An Equilateral Triangle would have equal angles, and therefore, a common agenda. A scalene triangle has no equal sides, and therefore, three differing but not opposing agendas. Even when there are two equal angles and one differing, they are not opposing.

When combined within or on the surface of a Geometric Sphere, polygons that butt up to the sides of a triangle would determine the mediation e.g. if three squares butted up to the sides of an Equilateral triangle, Intellect would be mediated by the unbiased Creative Thought of Imagination. Therefore, Intellect would influence the Creativity of Imagination. However, if two sides of an isosceles triangle were butted up to squares and one side to a Pentagon, Motive would be Creatively Mediated through the influence of Intellect. This is how spheres of Thought are formed and influenced through a combination of differing traits. It is how Mindstates are formed.

TIME

Thought-Intention-Motivation-Expression

Thought is a Precise Opinion. An Intention of Thought, or Thought-Intention, is an Agenda. Motive is a Personal Agenda. Therefore, TIME is an Expression referring to a Personal Agenda.

Why did we create a clock face that has 12 Major Points of a Dodecagon, and between each Point there are divisions of 5 secondary Points, which make 60 Points.

In Geometrical Thought Harmonics, a Dodecagon represents Synchronicity. However, through the addition of the secondary Points, a 60-Point design combines 5 interactive Dodecagons of Synchronicity to represent a Motive-interactive Synchronicity. More precisely, it would be an Identity-interactive Synchronicity.

In essence, Synchronicity refers to TIME-RELATED COINCIDENCES. Identity-interactive TIME-related coincidences are formed through a collaboration and interaction of Imagination, Intellect, Love, Awareness, Synchronicity, Motive, Belief, and Identity. However, the basic components are a Creative agenda of Imagination, a Receptive and Constructive agenda of Intellect, and a Personal agenda of Motive. Therefore, TIME is a Creative mediation that is Intellectually and Motivationally influenced. When did TIME begin? In some circles, TIME is recognised as a Man-made construct. Motive or Personal Thought is recognised as the beginning of Consciousness within the Mind. Before that, Mind was Unconscious, which means it had no Personal Thought or input. Through Personal programming, a Subconscious manifested. In consideration, TIME would have been seeded when Mind developed Personal Thought. It would have been focused through the Mediation of Creative Thought to form a Motive-based Sense of Desire.

Seeded is one thing. However, it would have Actualised when Belief, resulting from an interaction of Personal Thought, which is a declaration of Personal Preference or Choice, manifested within the Subconscious Mind. From an interaction of Belief, Identities formed. From the Suggestive Nature of Identity, Personalities formed.

Amnesia is an inability to access Personal Memory. It is quite often brought on by a traumatic experience. A Personality blocks access to the Memories of that experience as a survival mechanism. It no longer Identifies with those chronological Memories. Personality quite often alters due to that dissociation. Mind, as an accumulation and categorisation of Thoughts, when Individuality manifested as a Logical construct based upon Personality, became a TIME-governed Dreamscape reflecting dissociative Personality disorders. Why did Personalities dissociate from the Memories that created them?

Identity Mind of Individuality

Personality, or Personal Reality, initiates an Identity Mind of Individuality, which is a Logical construct based upon an Identity-interactive Attitudinal Feeling or behaviour. A collaboration and interaction of the Emotional/Suggestive Belief of Intuition and Faith, which is Trust-based Free Will, manifests the Personal Reality of Personality.

Evolvability is the ability to evolve. It is an Identity-polarised Emotional Logic, which is an interactive Belief-polarised Emotional Logic of Affirmation. Therefore, Evolvability is a direct result of Interactive Affirmations, which are Belief-polarised Agreements of Emotional Intelligence. However, it also forms Evolvability-awareness, which is Identity-interactive Emotional Logic of Self-awareness. Therefore, Personality-based Evolvability-awareness is the Emotional/Suggestive/Hypothetical Intelligence that initiates the Mental/Detailed/Theoretical and Physical/Experimental/Practical Logic states of an Identity Mind of Individuality.

An Identity Mind has many states of Conscience, which is Mental/Detailed/Theoretical Logic. It has Identity-interactive Motive Logic Interpretations, Identity-interactive Belief Logic Interpretations, and Identity Logic Interpretations. It also has many states of Identity-interactive Physical/Experimental/Practical Logic Applications. It has Identity-interactive Common Logic Applications, Identity-interactive Motive Logic Applications, Identity-interactive Belief Logic Applications, and Identity Logic Applications. Therefore, an Identity Mind of Individuality can manifest an Identity-interactive Common Logic Reality.

Identity-interactive Common Logic Reality

What is a Common Logic Reality? It is formed by Common Sense Agreements, which are Creative Agreements. What we have labelled as Life, is an Identity-interactive Common Logic Reality, which is a reflection of an Identity-interactive Common Library Of Growing Intelligent Concepts. All Identities within this Common Logic Reality influence, and are influenced by, a Common Macro Environment within the Unconscious Mind of Pure Potential.

In essence, Space reflects a partitioned Mind of Pure Potential. Isolated Stars and Planets form Galaxies that are also isolated to form a Universe, which is a partitioned Mind of Pure Potential. It is the Pure Potential of Thought reflecting upon its SELF and forming a Spherically partitioned Mind. However, Galaxies are usually Planar. PLANE stands for Positioned Level And Nexus Evaluation.

SPHERE

Sentient Plasma Heraldng Entity Recognition Exaltation

Sentient can mean 'having Sense and Feeling'. Nature is an Attitudinal expression of Emotional Intelligence, a Sensory expression of Feeling, or a Sensory behaviour. PLASMA is an acronym for Polymeric Lattice Actively Simulating Mass Aggregation. Poly can mean 'many' and 'Meric' can mean parts. Therefore, Polymeric can mean many parts. POLY can also stand for Potential Of Life Yield and MERIC can stand for Maximised Entity Regulation In Contrast, which is Potential Of Life Yield-Maximised Entity Regulation In Contrast. Therefore, PLASMA can mean a Virtualised Matrix. Spheres could form a Virtualised Matrix of Sensory behaviour, which could be a Virtual Mind or Dreamscape. Is Mind a Dreamscape; an accumulation and categorisation of Potential Thoughts?

DREAMSCAPE

A DREAM is a Direct Response Expressed Attitude Manipulation. A Dreamscape is a Virtual Environment. Nature is an Attitudinal expression of Feeling. A Direct Response is a Reflex Response. FEELING is an expression of Emotional/Suggestive Intelligence. Manipulation can mean influence. Emotional/Suggestive Thought can influence. Intuition is Emotional/Suggestive Awareness impressed by Desire, influenced by Emotional/Suggestive Belief, and expressed through a Personalised Nature, which is a Motive-regulated Attitudinal expression of Emotional/Suggestive Intelligence. Does Intuition interconnect Personalised Dreams or Personalities within a Common Dreamscape or Common Logic Reality?

If Mind is a Dreamscape of Pure Potential, and Pure Potential is an infinite source of Possible Thoughts, then Pure Potential could have an infinite number of Dreamscapes and therefore an infinite number of Minds. Those Dreamscapes or Minds could also be infinitely different.

Synchronicity Mind of Commonality

Synchronicity is a collaboration and interaction of Creative Thought, which is Imagination, Intellect, Love, which is Unconditional Acceptance, and Awareness, which is a Love-based Sense Agreement or Conclusive Agreement of Imagination. Creative Thought of Imagination is mediative, Awareness is a Mediative Sense Agreement, and Synchronicity is an interactive Mediative Sense Agreement that is influenced by the interaction of Intellect.

A Commonality Mind, Common Reality or Common Dreamscape, can be Unconscious and Subconscious. An Unconscious Synchronicity Mind has no Personal input. It is Unconsciously programmed, initiated by a collaboration and interaction of Self-awareness, Common Logic, and Passion, or, Self-respect and Passion, which creates the Synchronised Respect and Synchronised Nature of Mutual Respect. In this case, the Attitudinal behaviour of Nature manifests because of the Synchronicity-

interactive Emotional/Suggestive Awareness of Self-awareness and Passion in collaboration with the Common Sense Agreement of Common Logic.

A Subconscious Commonality Mind, or Subconscious Synchronicity Mind, is initiated by a collaboration and interaction of the Emotional/Suggestive Awareness of Intuition and Instinctual Respect, which forms the Synchronised Respect and Synchronised Nature of Mutual Respect.

The Common initiator in both the Unconscious and Subconscious Synchronicity Minds is a Common Sense Agreement of Nature-based Common Sensory Logic. Therefore, they can both create Common Logic Realities created by Common Sense Agreements, which are mediative Interpretations that detail the Intellectual Applications of a Common Logic Reality.

SOUL – State Of Unified Love

Awareness is a Love-based Sense-agreement, or a Conclusive Agreement of focused Imagination. In Geometrical Thought Harmonics, it is represented by a centre-point Hexagon, which is a Hexagon formed by six Equilateral Triangles connecting to a common centre. A Hexagon represents Love, which is Unconditional Acceptance. An Equilateral Triangle represents the unbiased Creative Thought of Imagination. Sense is focused Creative Thought, and is represented by a Pyramid. A polygon with a centre-point forms an Agreement of the base design. Therefore, a centre-point Hexagon represents a Love-based Sense-agreement. It is a Planar Pyramid.

A centre-point Hexagon is the only polygon that can form a Planar Pyramid of focused Imagination. Love is Unconditional Acceptance, which allows all programs or Reflex Responses to form. Awareness is centrally focused Love, a Sense-agreement formed by Love, or a State Of Unified Love, which is the Unconscious SOUL. It is an unbiased or Unconditional Sense-agreement.

Self-awareness is a construct of Emotional Awareness programmed by impressions of Common Sense and Attitude. Emotion is Suggestive. Therefore, Self-awareness is a construct of the Emotional/Suggestive SOUL created by impressions of Common Sense and Attitude. It is not Motive-regulated, and therefore not Conscious or Personalised. It is a construct of the Emotional/Suggestive Unconscious SOUL, which is programmed by Common Sense and Attitude.

If Self-awareness becomes Motive-regulated, it forms Compassion, a construct of the Emotional/Suggestive Subconscious SOUL, which is programmed by Common Sense and Attitude.

Intuition is a construct of Emotional/Suggestive Awareness programmed by impressions of Desire, which is Motive-based Sense. It is also a construct of Emotional Belief, which is an interactive Motive. Belief is a declaration of Personal preference or Choice. Intuition is also a personalised expression of Nature, or Attitudinal Feeling, which is an Attitudinal expression of Emotional/Suggestive Intellect.

The Subconscious is Personally or Consciously programmed. Love is unconditional acceptance, which allows all programs or Reflex Responses to form. Therefore, Intuition is a construct of the Emotional/Suggestive Subconscious SOUL, which is programmed by impressions of Desire. It is the Belief-regulated Nature of the Emotional/Suggestive Subconscious SOUL.

Mental planes of a Geometric Sphere Detail that Sphere. If a Geometric Sphere has Mental centre-point Hexagon planes, it would become a construct of the Mental/Detailed SOUL. If that Geometric Sphere were Motive-regulated, it would become a construct of the Mental/Detailed Subconscious SOUL. If it were not Motive-regulated, it would become a construct of the Mental/Detailed Unconscious SOUL.

The Mental/Detailed Unconscious SOUL would form an Agreement with the Common Sense-agreements of Common Logic and be focused by those Common Sense-agreements. Therefore, the Mental/Detailed Unconscious SOUL would become a programmed expression of the Common Sense-agreements of Common Logic.

The Mental/Detailed Subconscious SOUL would form an Agreement with the Personalised Common Sense-agreements of Common Logic, which form Instinct, and be focused by Instinct. Therefore, the Mental/Detailed Subconscious SOUL would become a programmed expression of Instinct.

Physical or external planes of a Geometric Sphere are Experimental or Practical Planes. Physical centre-point Hexagon planes would form a construct of the Physical/Experimental SOUL. If the Sphere were not Motive-regulated, it would become a construct of the Physical/Experimental Unconscious SOUL. If it were Motive-regulated, it would become a construct of the Physical/Experimental Subconscious SOUL. The Physical/Experimental Unconscious SOUL would become a programmed expression of the Common Sense-agreements of Common Logic. The Physical/Experimental Subconscious SOUL would become a programmed expression of Instinct.

SOUL can be an Emotional/Suggestive/Hypothetical Sense-agreement programmed by and impressed by Common Sense, Attitude, and Desire, a Mental/Detailed/Theoretical Sense-agreement programmed by and expressed by Common Sense, and a Physical/Experimental/Practical Sense-agreement programmed by and expressed by Common Sense.

Inspiration is an Agreement of Emotional/Suggestive Awareness. Therefore, it is an Agreement of the Emotional/Suggestive SOUL. However, it is polarised by Physical/Experimental Awareness. Therefore, Inspiration is an Agreement of the Emotional/Suggestive SOUL that is polarised by the Physical/Experimental SOUL. In this design, the Physical/Experimental SOUL forms by an Agreement of the Emotional/Suggestive SOUL. Mental Intellect Details and programs the Suggestions of the SOUL to become a programmed Agreement of the Experimental or Practical SOUL.

In its initial state, Inspiration is a construct of the Emotional/Suggestive Unconscious SOUL. If it forms by a construct of Intuition, which becomes Intuitive Inspiration, Mental Intellect Details the Suggestions of the Subconscious SOUL to become a programmed Agreement of the Physical/Experimental Subconscious SOUL.

Respect is Awareness-based Feeling, which is an Awareness-based expression of Emotional/Suggestive Intelligence that Suggests Awareness-based behaviour. It is a Feeling or behaviour that is Suggested by the Unconscious SOUL, which is a behavioural expression of the Emotional/Suggestive Unconscious SOUL.

Tolerance is an Awareness-polarised Agreement of Emotional/Suggestive Intelligence, which is Awareness-polarised Emotional/Suggestive Logic. It is a Logic Agreement of the Physical/Experimental Unconscious SOUL.

Instinctual Respect is a construct of Instinct, a Personalised construct of Common Logic Applications, formed by Respect. It is an Instinctual behavioural expression of the Emotional/Suggestive Subconscious SOUL.

Integration is a Personalised or Motive-regulated construct of Tolerance. It is a Personalised Logic Agreement of the Physical/Experimental Subconscious SOUL.

Reason is Love-regulated Mental and Physical Intellect. It is formed by Physical Hexagon planes of Love, Physical Square planes of Intellect, and Mental Square planes of Intellect. The Mental Square planes of Intellect form diagonals of the Hexagons of Love to form centre-point Hexagons of Awareness.

Therefore, the Love-based Sense-agreements of Awareness are formed by Mental Intellect-agreements. The centre-points of the Hexagons form the points of a Cube of Common Logic within the design of Reason. Reason becomes a construct of the Physical/Experimental Unconscious SOUL that is a Sensory expression of the Common Sense-agreements of Common Logic. It is Physically programmed by the Physical Square planes of Intellect, Mentally programmed and Detailed by the Mental Square planes of Intellect that form the diagonals of the centre-point Hexagons of Awareness, and expressed by the

Common Sense-agreements of Common Logic.

If Reason is Personalised, it forms Justice, which is impressed by Desire. If it forms Instinct-regulated Justice, it becomes a construct of the Mental/Detailed Subconscious SOUL, which is an expression of the Personalised Common Sense-agreements of Instinct.

If Justice is formed by a construct of Intuition, it becomes Intuitive Justice, Social Justice, or Karmic Justice. Intuitive Justice becomes a construct of the Emotional/Suggestive Subconscious SOUL, which is programmed by impressions of Belief-interactive Desire.

In the Language of Mind, Physical means Experimental or Practical, Mental means Detailed or Theoretical, and Emotional means Suggestive or Hypothetical. Conscious means Motive-regulated or Personalised, Subconscious means Personally or Consciously programmed, and Unconscious means having no Personal or Conscious agenda.

Regarding Awareness or SOUL, there can only be Unconscious and Subconscious aspects because a Hexagon of Love is a Reflex Response or program. A centre-point Hexagon of Awareness is a Reflex Responsive or programmed Sense-agreement. Therefore, SOUL is a Reflex Responsive or programmed Sense-agreement.

SATAN

Previously, we spoke of the proposition that Satan once expressed the “Will of God”. In Geometrical Thought Harmonics, we inferred that the Icosahedron of WILL referred to SPIRIT. We also inferred that the Icosidodecahedron of Intuition referred to God. Therefore, if this were correct, the “Will of God” would refer to the Spirit of Intuition, or, an Intuitive Spirit.

Why would Satan, or the Devil, be an expression of an Intuitive Spirit? For that matter, why would Gods and Devils have been imagined at all?

If we accept that in ancient times people in general were superstitious, or Fearful, reflections of Fear would have been imagined within the Mind, and, within the Dream of Mind that we have accepted as Life. Any Being with extraordinary abilities would either have been Feared or revered. It would therefore make sense that conceptions of Gods and Devils could have manifested within the Dreams of Mind. What is an Intuitive Spirit, or, a Spirit of Intuition? Intuition is the Belief-regulated Nature of the Emotional/Suggestive Subconscious SOUL. Within the Instinctive Mind, which is the Virtual Brain-mind, WILL or Spirit is at the core. Intuition is the next progression of the Virtual Brain-mind. It projects the Virtual Brain of Instinct as a Common Sense expression of Intuitive Nature. Through the Common Sensory interconnections that projected Instinct into Being, Diversions of Personal Conscience and Social or Environmental Conscience were created. The Diversion of Language and Species Differentiation manifested as a Motive-interpretation formed by the Personalised Common Logic of Instinct. As a result, the WILL or SPIRIT of the Virtual Brain-mind became the expression of Desire that labelled, recognised, and recalled Instinctual Memory, which is a Personalised Common Library Of Growing Intelligent Concepts. Therefore, SPIRIT can manifest and express the Memory within that Library.

EVIL stands for Expressing Violence In Life. DEVIL stands for Deity Expressing Violence In Life. VIOLENCE stands for Voluntarily Initiated Overt Love Excluded Nature Carelessly Expressed. Through this interpretation, any Being who Expressed Violence In Life could be regarded as EVIL.

WILL is Wish Instructed Potential, which is an expression of Desire. A Wish is a Desire. SPIRIT is Sentient Plasma Initiating Radiant Intuitive Thought. Sentient Plasma is a Virtualised Matrix of Sensory behaviour. Sentient can allude to Sensory Feeling, which is Sensory behaviour.

Mind is a Logical construct initiated by Feeling, which Suggests behaviour. A Common Logic Mind is initiated by Nature, which is Attitudinal Feeling that Suggests Attitudinal behaviour. Attitude is Intellect-

based Sense. Therefore, Nature is an expression of Sensory behaviour.

In Geometrical Thought Harmonics, the Icosahedron of WILL forms Intuition by truncating the Pyramids of Desire. Intuition becomes a truncated derivative of WILL or SPIRIT.

Instinct, or the Virtual Brain, as an Instinctive Mind, could be regarded as a Mind of God. A Mind is an accumulation and categorisation of Thoughts. An Instinctive Mind is a Personalised Common Library Of Growing Intelligent Concepts formed by a Common Sense expression of Intuitive Nature. Sentient Plasma could be regarded as a Dream of Mind. Initiating Radiant Intuitive Thought could allude to Intuitive Nature, which is the Belief-regulated Nature of the Emotional/Suggestive Subconscious SOUL. If we accept that the Icosahedron of WILL manifests the Icosidodecahedron of Intuition and the other derivatives that form the Instinctive Mind, WILL should be accepted as SPIRIT. In that regard, SATAN or DEVIL could be a derivative of WILL, Wish Instructed Potential, which is SPIRIT.

In my opinion, DEVIL and SATAN refers to FEAR, which is a Form Experienced and Expressed Amnesia Reaction. FEAR is a derivative of WILL or SPIRIT formed by Personal Conscience and Language and Species Differentiation. They are constructs of Belief-interactive Motive Logic Interpretations and Applications.

A Virtual Brain-mind manifests Personal Conscience and Language and Species Differentiation as Diversions created by the Personalised Common Sense expressions of Intuitive Nature, and Motive-interpretations formed by the Personalised Common Logic Applications of Instinct.

DEVIL and SATAN would refer to Instinctual Beings who were experiencing and expressing FEAR. In my opinion, all Thought forms that manifested as reflections of FEAR would be reflections of a Virtual Brain-mind. In that regard, in the Dream of Mind, they would probably imagine a BRAIN – Body Related Active Intelligent Nemesis. In this regard, Nemesis would refer to cause and effect.

Through FEAR, competitive, survivalist, and separatist behaviour would have manifested. Violence would be a consequence of that behaviour. All partitions within the Mind would have manifested because of FEAR. All reflections of a partitioned Mind would have Virtualised within the Dream of Mind that we have accepted as Life.

ENERGY

The acronym for ENERGY is Expressive Natural Entity Radiated Gamut Yield. The acronym for THOUGHT is Torrid Heart Of Unity Guided Harmonic Transmission.

It has been said, “Where Thought goes, energy flows”. Is that because Energy and Thought are the same? It has also been said that Energy remains constant. It just changes form. If Pure Potential is an infinite source of possibilities, or possible Thoughts, and Thought is the Potential to Think, which is the source of all Thoughts, is Pure Potential the Potential to Think? In that regard, is Pure Potential the ENERGY that in essence remains constant but just changes form? If it were, it would be THOUGHT, which is the Potential to Think.

Thoughts are Opinions of an environment. Is Pure Potential, Thought, or Energy the source of all Opinions, which forms designs of Thought, agendas, and traits? Those designs of Thought, agendas, and traits would represent different forms of Energy. If this is correct, all forms of Sense, which are Pyramidal, would be focused Creative Energy. A Tetrahedron Pyramid would represent unbiased focused Physically Creative Energy. A Pentagon-based Pyramid of Desire would represent Motivationally focused Physically Creative Energy. A Square-based Pyramid of Attitude would represent Intellectually focused Physically Creative Energy, or, Receptive and Constructively focused Physically Creative Energy. A planar pyramid of Awareness would represent a Conclusive Agreement of focused Creative Energy.

In the same reference, all forms of Logic would accumulate and categorise Energy. In essence, Logic is encapsulated Intellect, which is encapsulated Receptive and Constructive Energy. A Cube of Common Logic would represent an unbiased encapsulation of Receptive and Constructive Energy. Emotional Logic would represent a Suggestive encapsulation of Receptive and Constructive Energy. Mental Logic would represent a Detailed encapsulation of Receptive and Constructive Energy. Physical Logic would represent an Experimental or Practical encapsulation of Receptive and Constructive Energy. Common Logic is an Experimental or Practical encapsulation of Receptive and Constructive Energy, created and Detailed by an Agreement of Common Sense, which would mean that Common Logic was Detailed by an Agreement of unbiased focused Physically Creative Energy.

By this assumption, WILL or SPIRIT would be an expression of Motivationally focused Physically Creative Energy, which is Desire. SOUL, or Awareness, would be a programmed Agreement of Unconditionally focused Creative Energy, which is a Conclusive Agreement of focused Creative Energy. Instinct would be a Personalised encapsulation of Physically Receptive and Constructive Energy, which is Personalised Common Logic, Detailed by Agreements of unbiased focused Physically Creative Energy, which are Common Sense-agreements. Intuition would have Personalised Suggestive Agreements of Unconditionally focused Creative Energy, or Personalised Suggestive Awareness, programmed by impressions of Motivationally focused Mentally and Physically Creative Energy, which is Desire. It would also have Personalised expressions of Receptive and Constructively focused Physically Creative Energy that formed Personalised Nature. In addition, Intuition forms by Emotional Belief, which means that it forms by Suggestive Preferential Energy.

If this is correct, all Thought forms would be purposed Energy. The Square-based Pyramids of Egypt would symbolise Receptive and Constructively focused Physically Creative Energy. Cubic Atomic structure would represent encapsulated Receptive and Constructive Energy. Hexagonal structure would represent programmed Agreements of Unconditionally focused Creative Energy. Tetrahedral structure would represent unbiased focused Physically Creative Energy. Octahedral structure would represent Suggestive expressions of Receptive and Constructively focused Physically Creative Energy. Hormones would represent programmed Motivational Energy. DNA would be a structure of programmed Motivational Energy, due to its Pentagons and Hexagons, and unbiased focused Physically Creative Energy due to its Tetrahedron Pyramids.

Feeling is an expression of Emotional Intelligence. Regarding Energy, it would be a Suggestive expression of Receptive and Constructive Energy. Attitudinal Feeling is Nature, which is an Attitudinal expression of Emotional Intelligence. Regarding Energy, it would be a Suggestive expression of Receptive and Constructively focused Physically Creative Energy.

If Thought is Energy, why do we need food? We should get everything we need by Thinking.

Memory or Mind is an accumulation and categorisation of Thoughts, which is an accumulation and categorisation of Energy. It is a Logical structure initiated by Feeling, which would be encapsulated Receptive and Constructive Energy initiated by the Suggestive expressions of Receptive and Constructive Energy. If Mind were initiated by the Attitudinal Feeling of Nature, it would be encapsulated Receptive and Constructive Energy initiated by Suggestive expressions of Receptive and Constructively focused Physically Creative Energy.

If Mind were unaware of its own Potential, the Dreams of Mind would reflect that lack of Awareness. Therefore, in the Dreams of Mind, Personalities would reflect a need for sustenance by a means other than their own Potential. Is this why we Think we need to eat to gain Energy? In essence, we are gaining Energy because everything is a form of Energy. However, if Thought is Energy, our Thoughts should sustain us.

In essence, we reflect a way of Thinking. If that way of Thinking were ignorant of its own Potential, a need for sustenance outside the SELF would make Sense. In addition, confusion and Fear could cause unstable Energy, which could cause disease and injury due to inferior concepts of SELF.

Viruses are Motivational programs and expressions of focused Creative Energy. Actually, all Thought forms with DNA are Motivational programs and expressions of focused Creative Energy.

Memory is an accumulation of Thoughts, which we now know is Energy. Unconscious Memory is an accumulation of Non-personalised Energy. It is not Motivational. Conscious Memory is Personalised and Motivational Energy. Subconscious Memory is Personally programmed and Reflex Responsive Motivational Energy.

Energy Healing

Energy Healing transmutes the accumulation of disharmonious or incompatible Thoughts. An accumulation of Thoughts is Memory. Mind is an accumulation and categorisation of Thoughts. It is a Logical construct initiated by Feeling, which is an expression of Emotional/Suggestive Intelligence. LOGIC is a Library Of Growing Intelligent Concepts. It has Emotional/Suggestive/Hypothetical, Mental/Detailed/Theoretical, and Physical/Experimental/Practical forms.

Body is a reflection of Mind. The acronym of BODY is Being Of Direct Yield. The acronym of BEING is Brain Expressed Intelligent Natural Guise. The acronym of BRAIN is Body Related Active Intelligent Nemesis. Nemesis, in this regard, means cause and effect. Therefore, Body is a virtualised projection of purposed and programmed Energy, which is purposed and programmed Thought.

Instinct is a Virtual Brain. A Virtual Brain-mind is an Instinctive Mind. Initially, it forms through an interconnection of the Common Sense-agreements of Instinct. Through this interconnection, Will, Intuition, Personal Conscience, Social or Environmental Conscience, and Language and Species Differentiation form the Potential of Instinct.

WILL is an expression of Desire. It is a Motivationally focused expression of Physically and Mentally Creative Energy, which is the core of the Virtual Brain-mind.

Intuition is the Agreement formed by the Common Sense-agreements of Instinct. It is a Personalised construct of Emotional/Suggestive/Hypothetical Awareness formed by impressions of Desire, a construct of Emotional/Suggestive/Hypothetical Belief, and a Personalised expression of Nature, which is an Attitudinal expression of Emotional/Suggestive/Hypothetical Intelligence. Therefore, regarding Energy, Intuition is Suggestive through Personalised Conclusively Agreements of focused Creative Energy, which is Personalised Awareness, interactive Motivational Energy, which is Belief, and Personalised Receptive and Constructively focused Physically Creative Energy, which is the Personalised Attitudinal Feeling or behaviour of Nature.

Personal Conscience is a construct of Belief-interactive Motive Logic Interpretations, which is Mental/Detailed/Theoretical Logic. Regarding Energy, it is a Mental encapsulation of Preferentially interactive Motivationally categorised Receptive and Constructive Energy. It is a Diversion to the Agreement of Intuition formed by Instinct's Common Sense, which is unbiased focused Physically Creative Energy.

Social or Environmental Conscience is a construct of Love-interactive Creative Logic Applications. Regarding Energy, it is a Physical encapsulation of program-interactive Creatively categorised Receptive and Constructive Energy. It is a Diversion to the Agreement of Intuition formed by Instinct's Common Sense, which is unbiased focused Physically Creative Energy.

Language and Species Differentiation is a construct of Belief-interactive Motive Logic Applications, which is Physical/Experimental/Practical Logic. Regarding Energy, it is a Physical encapsulation of Preferentially interactive Motivationally categorised Receptive and Constructive Energy. It is a Motive

Interpretation formed by Instinct's Common Logic, which is a Physical encapsulation of unbiased Receptive and Constructive Energy.

Through this formulation, Physical structure would be a Physical/Experimental/Practical encapsulation of Energy. Receptive and Constructive Energy, which is Intellect, takes on board and builds upon concepts. A Physical encapsulation of Receptive and Constructive Energy is Practical Memory.

How do we transmute Physically encapsulated Energy? Regarding Mind, it would probably start with a Suggestion. A Suggestive encapsulation of Energy, through Emotional or Hypothetical Logic, would become a Detailed encapsulation of Energy, through Mental or Theoretical Logic, and then an Experimental encapsulation of Energy through Physical or Practical Logic.

Sense is focused Creative Energy, focused Creative Thought, or focused Imagination. It labels, recognises, and recalls Memory. Therefore, through the Senses, Energy is labelled, recognised, and recalled.

If the Pyramids of Sense are directed inward within a Sphere, it is creating impressions of focused Creative Energy. If they are directed outwards, they are expressing focused Creative Energy.

Regarding Logic, expressions of Sense are labelling Memory. Impressions of Sense are recognising and recalling Memory.

If a Sense is biased, it has a different base to its focused Creative facets. Therefore, it would label, recognise, and recall biased Memory e.g. Common Sense has all Triangular faces, which makes it unbiased. The Intellect-based Sense of Attitude has a Square base, which has a Receptive and Constructive bias. The Motive-based Sense of Desire has a Pentagon base, which has a Personal or Conscious bias, and the Love-based Sense-agreement of Awareness has a Hexagon base, which has a programmed or Reflex Responsive bias. All forms of Sense other than Common Sense have a biased agenda. When Motive-regulated, they become Personalised Senses e.g. Instinct is a Motive-regulated construct of Common Sense-agreements, which creates Personalised Common Sense-agreements.

Intuition, which is a Personalised expression of Nature, is the Agreement formed by the Personalised Common Sense-agreements.

In an Unconscious Mind, Common Sense, Attitude, and Awareness can label, recognise, and recall the Energy stored as encapsulated Receptive and Constructive Energy. Through Logic, a Library Of Growing Intelligent Concepts, Energy (or Thoughts) can be taken on board and built upon, which can mean accumulated, categorised, and evolved. However, that can be good, bad, or indifferent, dependent upon compatibility and preferentiality.

In a Conscious Mind, which is Motive-based or preferential, Desire, Personalised Common Sense, and Personalised Attitude can label, recognise, and recall the Energy stored as encapsulated Receptive and Constructive Energy.

In a Subconscious Mind, which is Personally programmed, the same Senses as the Conscious Mind can label, recognise, and recall the Energy stored as encapsulated Receptive and Constructive Energy.

However, Personalised Love and Awareness forms the programs that make it Subconscious. Awareness is a programmed Sense-agreement, which is a programmed Agreement of focused Creative Energy. It is Love-based, which is Reflex Responsive Energy.

The designs of Thought that associate with Love and Awareness influence the programs e.g. the Intellect, Motive, and Belief of Intuition would program the Personalised Awareness of Intuition. Therefore, Receptive and Constructive Energy, Motivational Energy, and Preferential Energy would program Intuition's Conclusive Agreements of focused Creative Energy.

Unconsciously, Self-awareness would label, recognise, or internalise the Receptive and Constructively focused Physically Creative Energy of Attitude, and the unbiased focused Physically Creative Energy of

Common Sense, to create Suggestively programmed Conclusive Agreements of focused Creative Energy. Therefore, Self-awareness is programmed by impressions of Attitude and Common Sense. It also forms Emotional Logic Agreements, which are Suggestive Agreements of Receptive and Constructive Energy. The Agreement formed by the Emotional Logic of Self-awareness is the Attitudinal Feeling or behaviour of Nature. This becomes a Nature-based Emotional Logic Agreement of Self-awareness.

Subconsciously, Intuition would label Receptive and Constructively focused Physically Creative Energy by its expressions of Nature. It would recognise and recall programmed Agreements of Personal or Motivationally focused Mentally and Physically Creative Energy by the impressions of Desire that program the Suggestive Awareness of Intuition. In other words, it creates impressions of Awareness programmed by Desire.

Consciously, WILL would label or interpret Motivational Energy by its expressions and Interpretations of Desire. It is Physically and Mentally Creative. In addition, it is Mentally Motivational.

In summary, Will expresses Motivationally focused Mentally and Physically Creative Energy. Intuition expresses Personalised Receptive and Constructively focused Physically Creative Energy, and impresses Motivationally focused Emotional/Suggestive Agreements of Mentally and Physically Creative Energy. Common Logic is an encapsulation of unbiased Physical/Experimental Receptive and Constructive Energy created by a Common Sense-agreement of Nature, which is a Common Sense expression of Attitudinal behaviour. Instinct is a Personalised encapsulation of unbiased Physical/Experimental Receptive and Constructive Energy created by the Common Sense-agreements of Intuitive Nature, which is a Common Sense expression of Personalised Attitudinal behaviour.

Behaviour is an expression of Emotional/Suggestive Receptive and Constructive Energy, which is Feeling. Attitudinal behaviour is an expression of Emotional/Suggestive Receptive and Constructively focused Physically Creative Energy, which is Attitudinal Feeling.

Language and Species Differentiation, which is a construct of Belief-interactive Motive Logic Applications, Social or Environmental Conscience, which is a Personalised construct of Love-interactive Creative Logic Applications, and Instinct, which is a Personalised construct of Common Logic Applications, are Physical/Experimental/Practical encapsulations of Receptive and Constructive Energy. Personal Conscience is a construct of Belief-interactive Motive Logic Interpretations. It is a Mental/Detailed/Theoretical encapsulation of Receptive and Constructive Energy, which leads to the Physical/Experimental/Practical Applications of Language and Species Differentiation. They are Conscious Mindstates of a Belief-mind. Social or Environmental Conscience is a Subconscious Mindstate of a Subconscious Awareness-mind.

Intuition, which is the Belief-regulated Nature of the Emotional/Suggestive Subconscious SOUL, is a Complementary and Subconscious Mindstate of the Belief-mind, the Subconscious Awareness-mind, the Subconscious Morality-mind, and the Brain-mind. All Personalised Mindstates are influenced by the Suggestions of Intuition.

Intuitive Healing

Intuitive Healing is a progressive form of Emotional/Suggestive Energy Healing, which can transmute Beliefs, Personalised Awareness, and the Attitudinal Feeling of Personalised Nature. As we have said before, Feeling initiates the Emotional, Mental, and Physical Logic states of Mind. However, Emotion in general Suggests Healing. It is the power of Suggestion, which has been labelled as the Placebo Effect. Intuitive Healing is possible through Suggestive Belief, Suggestive Awareness impressed by the Motivationally focused Mentally and Physically Creative Energy of Desire, and Suggestive Intelligence expressed through the Receptive and Constructively focused Physically Creative Energy of Personalised

Nature. It is internally focused, Emotional/Suggestive Awareness or SOUL focused, Desired Healing, and externally focused Attitudinal behavioural Healing.

Faith Healing

Faith is a construct of Will formed by Trust, which becomes Trust-based Will. It initiates the Belief-mind of Actuality. Trust is Belief-based Feeling, which is an expression of Emotional/Suggestive Belief-based behaviour. Will is an expression of Desire, which is an expression of Motivationally focused Mentally and Physically Creative Energy. Will and the Belief-based Feeling of Trust initiate Faith Healing. It is possible through Suggestive Belief expressed through the Suggestive Intelligence of Trust, and also expressed through the Motivationally focused Mentally and Physically Creative Energy of Will. Faith Healing is externally or Spiritually focused Desired Healing and Emotional/Suggestive Belief-based behavioural Healing.

Intuitive Faith Healing

Intuitive Faith initiates the Identity-mind of Individuality. The Emotional/Suggestive Belief of Intuition and the Emotional/Suggestive Belief of Faith merge to form an Emotional/Suggestive Identity. That Identity is expressed through the Receptive and Constructively focused Physically Creative Energy of Nature to form an Identity-interactive Nature of Personality, which is a Personal Reality. Intuitive Faith Healing is possible through Suggestive Identity, which is an interaction of Suggestive Intellect, Suggestive Motive, and Suggestive Belief, expressed through the Suggestive Intelligence of Trust and the Receptive and Constructively focused Physically Creative Energy of Nature that forms the Identity-interactive Nature of Personality or Personal Reality. It is internally focused, Emotional/Suggestive Awareness or SOUL focused, Desired Healing, externally focused Attitudinal behavioural Healing, and externally or Spiritually focused Desired Healing and Emotional/Suggestive Belief-based behavioural Healing.

Compassion Healing

Compassion is a Personalised construct of Self-awareness, which is a construct of the Emotional/Suggestive Subconscious SOUL, or Emotional/Suggestive Awareness, impressed by Attitude and Common Sense. It is also a Personalised construct of Emotional Logic, which is an Agreement of Emotional/Suggestive Receptive and Constructive Energy. Compassion Healing is possible through Personalised Emotional/Suggestive Awareness, impressed by Receptive and Constructively focused Physically Creative Energy and unbiased focused Physically Creative Energy, and Personalised Agreements of Emotional/Suggestive Receptive and Constructive Energy. It is internally focused, Emotional/Suggestive Awareness or SOUL focused, Attitudinal and Common Sensory Healing.

Intuitive Compassion Healing

Intuitive Compassion initiates the Subconscious Morality-mind. It is a collaboration of the Moral-interactive Nature of Virtue and Self-awareness, which forms Virtue-awareness. Morality is a product of interactive Intelligence. Virtue is a Moral-interactive expression of Receptive and Constructively focused Physically Creative Energy. Intuitive Compassion Healing is possible through Personalised Emotional/Suggestive Awareness, impressed by Receptive and Constructively focused Physically Creative Energy and unbiased focused Physically Creative Energy, Personalised Agreements of Emotional/Suggestive Receptive and Constructive Energy, and Personalised Moral-interactive expressions of Receptive and Constructively focused Physically Creative Energy. It is internally focused, Emotional/Suggestive Awareness or SOUL

focused, Attitudinal, Common Sensory, and Desired Healing, and externally focused Attitudinal behavioural Healing.

Energy Healing, continued

Internally focused, Emotional/Suggestive Awareness or SOUL focused, Attitudinal, Common Sensory, and Desired Healing is requested. Externally focused Attitudinal behavioural Healing and Desired Healing is manifested. Therefore, Intuitive Healing is requested through Desire-impressed Awareness and manifested through Personalised Attitudinal behaviour. Faith Healing is manifested through Will-expressed Desire and Faith-expressed Emotional/Suggestive Belief-based behaviour, which is Trust. Intuitive Faith Healing is requested through Desire-impressed Awareness, manifested through Will-expressed Desire, Personalised Attitudinal behaviour, and Faith-expressed Emotional/Suggestive Belief-based behaviour. Compassion Healing is requested through Attitude-impressed and Common Sense-impressed Awareness. Intuitive Compassion Healing is requested through Attitude-impressed, Common Sense-impressed, and Desire-impressed Awareness, and manifested through Personalised Attitudinal behaviour.

Healing can be Conscious, Subconscious or Personally programmed, and Unconsciously programmed, which has no Personal or Conscious input.

Faith Healing is Conscious Spiritual Healing. It is Suggestive through Emotional Belief and Emotional Intellect expressed through Belief-based Feeling or Trust. It is also expressed through the Desires of Will, which is Motivationally focused Physically and Mentally Creative Energy.

Intuitive Healing is Subconscious or Personally programmed Awareness or SOUL Healing. It is Suggestive through Emotional Intellect and expressed through Attitudinal Feeling or Nature, Suggestive through Emotional Awareness programmed by impressions of Desire, and Suggestive through Emotional Belief, which is a declaration of Personal preference or Choice.

Compassion Healing is Subconscious or Personally programmed Awareness or SOUL Healing. It is Suggestive through Emotional Intellect Agreements, which form Emotional Logic, and Emotional Awareness programmed by impressions of Attitude and Common Sense.

Intuitive Faith Healing is Subconscious or Personally programmed Spiritual Awareness or SOUL Healing. It is Suggestive through Emotional Belief and Emotional Intellect and expressed through Belief-based Feeling or Trust, Emotional Intellect expressed through Attitudinal Feeling or Nature, and Emotional Awareness programmed by impressions of Desire.

Intuitive Compassion Healing is Subconscious or Personally programmed Spiritual Awareness or SOUL Healing. It is Suggestive through Emotional Intellect and expressed through Attitudinal Feeling or Nature, Suggestive through Emotional Awareness programmed by impressions of Desire, Attitude, and Common Sense, and Suggestive through Emotional Belief.

Unconscious Healing has no Personal or Conscious input. It is Unconsciously Suggestive, programmed, and expressed.

DNA has linked Pentagons, which are Motivational and Conscious, Hexagons, which are Unconscious programs, and Pentagons fused to Hexagons by a Line of Thought, which forms Subconscious programs. The backbone of DNA forms by Tetrahedron Pyramids of Common Sense linked by Pentagons of Motive. Therefore, the backbone of DNA forms by expressions of unbiased focused Physically Creative Energy linked by Motivational or Personal Energy. DNA has Conscious, Subconscious or Personally programmed, and Unconsciously programmed functions.

Healing is usually achieved Unconsciously or Subconsciously. However, it can also be achieved Consciously. The initial formation of BODY was probably Unconscious. The evolution of BODY is

probably Subconscious or Self-perpetuating. Subconscious means Personally programmed, which usually infers that repetitive Conscious Thoughts were memorised, unconditionally accepted, and became Reflex Responses.

Living on Light

Intellect takes on board and builds upon concepts. It is Receptive and Constructive Energy. There is no Intellect in DNA. However, Intellect is present in Porphyrins, which are Intellectually Motivated. A Porphyrin forms by Pentagons of Motive that form a Square of Intellect at the centre of the molecular structure. They absorb Light, and are widely presented in Nature. Photosynthesis uses Porphyrins to convert light into usable energy.

The acronym of BLOOD is Body Logic Of Omniscient Development. The HEME in Blood is a Porphyrin. It is Intellectually programmed Motivation, which is Receptive and Constructively programmed Motivational Energy.

Heme forms by Pentagons of Motive that form a central Square of Intellect. However, it forms Hexagons of Unconditional Acceptance, which is Love, between the Pentagons of Motive. The Hexagons connect to an Agreement point at the centre of the Square of Intellect. Iron is the Agreement point at the centre of the Square of Intellect. Therefore, HEME forms Subconscious Receptive and Constructive Motivational program Agreements, which are Intellect-regulated Motivational Reflex Responses.

Porphyrins create the colours of Life. They are reflections of Personal Energy or Personal Thought conversion. Motive is Personal Thought or Personal Energy. Intellect is Receptive and Constructive Thought or Energy. Therefore, Porphyrins take on board and build upon Personal Energy, and, in some cases, form Reflex Responsive or programmed Agreements. They are present in the Protoplasm of cells and represent Personal Intelligence. In some cases, as in the HEME of Blood and the Chlorophyll of plants, they represent Personally programmed or Subconscious Intelligence. They are examples of Metalloporphyrins, in which a metal dominates the Porphyrin e.g. iron dominates the Receptive and Constructive properties of Heme and magnesium dominates the Receptive and Constructive properties of Chlorophyll.

The acronym of LIGHT is Love In Glowing Heavenly Thought. Love is Unconditional Acceptance, which is the principle that creates all programs and Reflex Responses. The acronym of GLOWING is Gradual Luminescence Of Wisdom In Natural Guise. The acronym of WISDOM is Willed Intuitive State Divine Omniscient Memory. The acronym of HEAVEN is Highly Evolved And Vehemently Expressed Nuptials. In this regard, Nuptials are the processes or acts of connection, relationship, or bonding. Thought is the Potential to Think. Therefore, Light is a programmed or Reflex Responsive evolution of Potential connections or relationships of Thought.

Unconscious Mind

Unconscious means without Conscious/Personal Thought or input. Mind is an accumulation and categorisation of Thoughts. It is a Logical construct initiated by Feeling, which is an expression of Emotional/Suggestive Intelligence. An Unconscious Mind would be a construct of impersonal Logic initiated by an impersonal expression of Emotional/Suggestive Intelligence. It would be without Motive. Awareness is SOUL. It is a Love-based Sense Agreement, which is a State Of Unified Love. An Awareness Mind is a SOUL Mind. It is a Logical construct initiated by Respect, which is Awareness-based Feeling or behaviour.

A collaboration of Common Logic and Self-awareness, or Common Logic and Passion, can create a progression of Respect. The former would create Self-respect, which is Respect for what we are, and the latter would create Passion Respect, which is Respect for what we do.

An Unconscious Mind would store and categorise Memory without Personal preference. That Memory would be permanent, but not chronological. A Conscious Mindstate would store and categorise Personal Memory. That Memory would be temporary, temporal, or chronological.

If Mind were a Dream of Pure Potential, and an accumulation and categorisation of Thoughts, a Personal or Conscious/Subconscious Mindstate would be a Personal or Conscious/Subconscious Dreamstate within the Unconscious Mind or Unconscious Dream. Therefore, a Personal or Conscious/Subconscious Mindstate or Dreamstate would accumulate and categorise short-term, temporary, or Random Access Memory and the Unconscious Mind or Dream would accumulate and categorise long-term, permanent, or Read-only Memory.

Infrastructure of the Unconscious Mind or Dream

If Intuition connects Personal/Conscious Mindstates or Dreamstates through Subconsciously Suggestive Intelligence, Awareness, and Belief, what connects the Personal/Conscious Mindstates or Dreamstates to the Unconscious Mind or Dream? Is it Nature, which is Attitudinal Feeling or behaviour? It has Suggestive Intelligence. Is it Emotion in general, which is Suggestive?

If Emotion connects all Mindstates or Dreamstates, and connects all Mindstates or Dreamstates to the Unconscious Mind or Dream, Unconscious Suggestions could influence all Mindstates or Dreamstates. If the term Unconscious was simply defined as impersonal or neutral, could any Mindstate or Dreamstate that displayed neutral behaviour be regarded as Unconsciously influenced? In that regard, Conscious is simply having a Motive or Personal agenda and Unconscious is not.

Mind could have Personal and impersonal Thoughts. A Belief-mind would be inherently Personal. It would be incapable of becoming impersonal. A Morality-mind, an Awareness-mind, and a Common Logic Mind could be inherently impersonal but capable of becoming Personalised. Therefore, a Belief-mind would be inherently Conscious and capable of becoming Subconscious. A Morality-mind, an Awareness-mind, and a Common Logic Mind could be inherently Unconscious but capable of becoming Conscious and Subconscious. However, through the power of Suggestion, a Belief-mind could be Unconsciously influenced. Therefore, the Mind or Dream of Pure Potential would be Impersonal/Unconscious with the Potential for Personal/Conscious and Subconscious Mindstates or Dreamstates.

Evolution of Nature

Nature is an expression of Attitudinal Feeling, which Suggests Attitudinal behaviour through Emotional Intelligence. Feeling or behaviour is an expression of Emotional/Suggestive Intellect or Intelligence. Intellect is Receptive and Constructive. It takes on board and builds upon concepts. Emotional Intellect would Suggest what concepts to take on board and build upon. Therefore, NATURE would Suggest what concepts to take on board, build upon, and express through the Practical Sense of Attitude.

Sense is focused Creative Thought, which is focused Imagination. Attitude is Intellect-based Sense, which is Receptive and Constructively focused Imagination. Nature, Attitudinal Feeling or behaviour, is a Suggestive expression of Receptive and Constructively focused Imagination.

Nature can evolve through a collaboration or fusion of Traits. A collaboration or fusion of Nature and Self-awareness would create an interactive Nature of Virtuous Self-awareness or Virtue-awareness. Virtue is Moral-interactive Nature. Emotional Awareness and Emotional Morality would Suggest the Nature of Virtue-awareness.

A fusion of Common Logic and Self-awareness creates Self-respect. A fusion of Passion and Self-awareness creates Passion-respect. A fusion of Self-respect and Passion-respect creates the Synchronicity-interactive Nature of Mutual Respect. A collaboration or fusion of Nature, Self-awareness,

Passion, and Common Logic would create an interactive Nature of Virtuous Peace. Peace is Mutual Respect, which is Synchronicity-interactive Nature. Respect is Awareness-based behaviour. Mutual Respect is Synchronised Awareness-based behaviour. Therefore, Virtuous Peace is a fusion of Virtue-awareness and Mutual Respect. Emotional Morality and Emotional Synchronicity would Suggest the Moral-interactive and Synchronicity-interactive Nature of Virtuous Peace.

If Nature combines with Reason, it creates the Nature of Empathy, which contributes to and enhances the Nature of Virtuous Peace. Many other Traits of Mind can contribute to the evolution of Nature.

Virtualised Miracles

What would we regard as a miracle? In dictionary terms, a miracle can be defined as an event that is contrary to the laws of Nature. In other words, contrary to what we would regard as Humanly possible. Therefore, miracles are usually concepts of superhuman or God-like abilities. Virtual can mean apparent but not actual; simulated but not accepted to be real.

Mind is an accumulation and categorisation of Thoughts. A Brain-mind could be regarded as a Personal Mindstate. It is the innate Potential of Basic Instinct, which is a Personalised Common Library Of Growing Intelligent Concepts; a Personalised Common Logic formed by Common Sense-agreements. However, a construct of Instinct Suggested by Awareness becomes Instinctual Respect. It is Personalised Common Logic Suggested by Awareness-based Feeling or behaviour. The Personalised Awareness Logic of Virtuality is Suggested by Instinctual Respect. Virtuality, or Virtual Reality, is a construct of Instinctual Awareness Logic; Personalised Common Logic forming Conclusive Agreements of Creative Logic.

Virtualised Miracles are abnormal events that are realised, unconditionally accepted or agreed upon, through Awareness.

Actualised Miracles

Actual can be defined as 'something that is Believed to be tangible or real'. Actuality, or Actual Reality, is Suggested by Faith, a construct of Will Suggested by Trust, which is a construct of Will Suggested by Belief-based Feeling or behaviour. Actual Reality becomes a construct of Practical Belief Logic.

Actualised Miracles are abnormal events that are realised, preferentially declared or chosen, through Belief.

Faithful Deliverance

In Geometrical Thought Harmonics, which is a language of Thought, Faith is a product of Trust formed by Will, which is an expression of Desire; a Physically and Mentally creative expression of Mental Motivation. Therefore, Faith is Wilful Trust.

Deliverance is an expression of Emotional/Suggestive Belief. It is a product of Trust, which is Belief-based behaviour. In dictionary terms, Deliverance can be defined as liberation, salvation, or release. Therefore, in Geometrical Thought Harmonics, it is a Trustful liberation.

Faithful Deliverance is a product and progression of Wilful Trust. It is a Wilfully Trusted Liberation.

Understanding

Define Understanding.

Emotional Logic is a Practical Agreement Suggested by Intellect. It is polarised, which means that it can be biased. In its basic form, it is unbiased. Self-awareness is a construct of unbiased Emotional Logic. Tolerance is a form of biased Emotional Logic. It is a Practical Agreement Suggested by Intellect and biased by Awareness. Charity is a Practical Agreement Suggested by Intellect and biased by Morality.

Affirmation is a Practical Agreement Suggested by Intellect and biased by Belief. Harmony is a Practical Agreement Suggested by Intellect and biased by Synchronicity. Evolvability is a Practical Agreement Suggested by Intellect and biased by Identity.

Understanding is Agreement. Emotional Logic is a Practical Understanding Suggested by Intellect. Tolerance is a Practical Understanding Suggested by Awareness-biased Intellect. Charity is a Practical Understanding Suggested by Moral-biased Intellect. Affirmation is a Practical Understanding Suggested by Belief-biased Intellect. Harmony is an interactively programmed Practical Understanding Suggested by Synchronicity-biased Intellect. Evolvability is a Practical Understanding Suggested by Identity-biased Intellect.

Awareness is a Conclusive Agreement of focused Creative Thought or Imagination. It is a Love-based Sense Agreement. Love is Unconditional Acceptance, which creates programs and reflex responses. Awareness is a programmed Agreement, which is an Understanding programmed by Imagination. Intuition is a Personalised product of Suggestive Awareness programmed by Impressions of Desire. It is a Personalised or Motive-regulated Emotional Understanding programmed by impressions of Desire. Self-awareness is not only a product of unbiased Emotional Logic. It is also a product of Suggestive Awareness programmed by Impressions of Attitude and Common Sense. Attitude is Intellect-based Sense, and therefore biased by Intellect. Common Sense is unbiased Sense. Self-awareness is a Practical Understanding Suggested by Intellect and an Emotional Understanding programmed by impressions of Attitude and Common Sense. Compassion is a Personalised or Motive-regulated product of Self-awareness. It becomes a Personalised or Motive-regulated Mental Understanding Suggested by Intellect and an Emotional Understanding programmed by impressions of Attitude and Common Sense. Common Logic is formed by a Common Sense Agreement. It is a Practical Understanding created by expressions of Common Sense. Instinct is a Personalised or Motive-regulated product of Common Logic. It becomes a Personalised or Motive-regulated Mental Understanding created by expressions of Common Sense.

Aspiration is a Suggestive Belief Agreement. It is a Practical Understanding Suggested by Belief and Detailed or Interpreted by Intellect. Inspiration is a Suggestive Awareness Agreement. It is a programmed Practical Understanding Suggested by Awareness and Detailed or Interpreted by Intellect. Emotional Agreements are Suggestive or Hypothetical Agreements. Mental Agreements are Detailed or Theoretical Agreements and Physical Agreements are Experimental or Practical Agreements. Practical Agreements Suggested by Intellect form the Physical or Practical Intellect of Self-awareness. A Common Sense Agreement forms the Practical Intellect of Common Logic. In Essence, the Creative Thought of a Common Sense Agreement is on the Mental Plane. Therefore, a Practical Agreement Detailed by Mental Creativity forms the Practical Intellect of Common Logic.

Reason is Love-regulated or programmed Mental and Physical Intellect. The Mental Intellect of Reason forms Love-based Sense Agreements of Awareness on the Physical plane. Therefore, Practical Agreements Detailed by Mental Intellect program the Practical Awareness of Reason. Regarding Understanding, Reason is a Practical Understanding Detailed or Interpreted by Intellect and Practiced through Awareness.

If we do not Understand something, it is because we are not in Agreement with that thing. We cannot explain something that we do not Understand. If we have a partial Agreement, or a limited Understanding, we can give a partial or limited explanation. A greater Understanding allows for a better explanation.

Perception

In dictionary terms, perception can mean just about anything that involves the taking in of information. However, perception is relative to the circumstances, conditioning, or point of view of the receiver. It is an understanding that is not formed by intellect or awareness, but a way of thinking between awareness, which is a conclusive agreement of imagination or Creative Thought, and morality, which is a product of interactive Intellect. A Moral is something that is learnt or understood from an experience. It is an experiential judgement.

In the Geometry of Mind, or the language of Thought, Perception is represented by a Heptagon, which is a seven sided figure. Intellect is represented by a Square, Awareness is represented by a centre-point Hexagon, which is six centrally focused Equilateral Triangles of Imagination or Creative Thought, and Morality is represented by an Octagon, which is formed by two interactive Squares of Intellect. A Heptagon (seven sided) is between the Hexagon (six sided) and the Octagon (eight sided). $6 + 8 = 14/2 = 7$.

Perception is therefore midway between Awareness's Conclusive Agreement of Imagination and Morality's Experiential Judgement.

Planar Agreements and Vortex Designs

Planar Agreements can be Emotional/Suggestive/Hypothetical, Mental/Detailed/Theoretical, and Physical/Experimental/Practical. They are Vortex Agreements. What does this mean? If we connect all the Points of a Polygon, which represents a Trait of Mind, to a central Point of the Polygon, that Point is a Vortex Agreement. If those Polygons are Physical (external) or Mental (internal except for centre dissecting) planes of a sphere, the Planar Vortex Points form a Vortex Design. If those planes are centre dissecting, or Emotional, they form one Sphere Vortex Point or Agreement, which dominates the sphere. Self-awareness is a product of Emotional Awareness, or Love-based Sense Agreements, and Emotional Logic Agreements. The Emotional Logic Agreements form the Practical Intellect planes of Self-awareness. The planar vortex points of each of those Practical Intellect planes form a Vortex design of Nature or Attitudinal Feeling, which is an Attitudinal expression of Emotional Intellect. Therefore, the Attitudinal Feeling of Nature becomes a product of Self-awareness's Practical Understanding formed by Emotional Intellect Agreements. It forms Nature-based or Attitudinal Feeling-based Self-awareness. A Common Sense Agreement forms the Practical Intellect planes of Common Logic. The planar vortex points of the Practical Intellect planes form a Vortex design of Nature or Attitudinal Feeling. Therefore, the Attitudinal Feeling of Nature becomes a product of Common Logic's Practical Understanding formed by the Mental Creativity of a Common Sense Agreement. It forms Nature-based or Attitudinal Feeling-based Common Sensory Logic.

Attitudinal Behaviour

Attitude could be defined as the position of a body in space; the position a body takes in relation to an environment. It is Intellect-based Sense. Intellect is receptive and constructive Thought. It takes on board and builds upon concepts. Sense is focused Creative Thought or Imagination. Therefore, Attitude Creatively focuses concepts that have been taken on board and built upon.

Feeling is an expression of Emotional Intellect. It expresses concepts that have been Suggestively taken on board and built upon. Behaviour is an expression of those concepts. The Attitudinal Feeling of Nature is a Physically Creative expression of concepts that have been Suggestively taken on board and built upon. It is Physically Creative Behaviour or Attitudinal Behaviour; the position a body expresses in relation to how it Feels about an environment.

Behavioural Logic

Logic is a Library Of Growing Intelligent Concepts. Behaviour expresses concepts that have been Suggestively taken on board and built upon. Mind is Behavioural Logic. It memorises, categorises, and stores expressed concepts that have been Suggestively taken on board and built upon.

Behavioural Logic can have Behavioural Emotional/Suggestive/Hypothetical Logic Agreements, Behavioural Mental/Detailed/Theoretical Logic Interpretations, and Behavioural Physical/Experimental/Practical Logic Applications.

Nature-based Self-awareness would be a Behavioural Emotional/Suggestive/Hypothetical Logic Agreement. Nature-based Common Sensory Logic would be a Behavioural Physical/Experimental/Practical Logic Application. To be more precise, Nature-based Self-awareness would be a Logical Agreement of Attitudinal Behaviour and a Suggested Awareness formed by impressions of Attitude and Common Sense (unbiased focused Creative Thought or Imagination). Nature-based Common Sensory Logic would be a Logical Application of Attitudinal Behaviour Detailed by expressions of Common Sense (unbiased focused Creative Thought or Imagination).

Behavioural Logic is not always Attitudinal. Respect is Awareness-based Feeling or Behaviour, which is not Attitudinally expressed Behaviour. When Respect is an Agreement of Tolerance, which is a Logical Agreement Suggested by Awareness-biased Intellect, it becomes Respect-based Tolerance, which is a Logical Agreement of Awareness-based Behaviour. When Respect-based Tolerance is Synchronised, it becomes Mutual Respect-based Harmony, which is a Logical Agreement of Synchronicity-interactive Attitudinal Behaviour.

Trust is Belief-based Feeling or Behaviour, which is not Attitudinally expressed Behaviour. When Trust is an Agreement of Affirmation, which is a Logical Agreement Suggested by Belief-biased Intellect, it becomes Trust-based Affirmation, which is a Logical Agreement of Belief-based Behaviour. When Trust-based Affirmation is Identified, it becomes Personality-based Evolvability, which is a Logical Agreement of Identity-interactive Attitudinal Behaviour.

Virtue is Moral-interactive Attitudinal Behaviour. Charity is a Practical Agreement Suggested by Moral-biased Intellect. Virtue-based Charity is a Logical Agreement of Moral-interactive Attitudinal Behaviour.

Instinctual Admonition

In Geometrical Thought Harmonics, which is a language of Thought, Instinct is Personalised Common Sensory Logic. Admonition is an expression of Emotional/Suggestive Awareness. In dictionary terms, it can be defined as counsel, advice, or warning. It is a product of Respect, which is Awareness-based behaviour. Therefore, in Geometrical Thought Harmonics, Admonition is Respectful Counsel.

Instinctual Respect is a product of Respect formed by Instinct. Instinctual Admonition is a product and progression of Instinctual Respect. It is a form of Behavioural Logic; a Personalised Practical Logic Application of Awareness-based Behaviour; a Personalised Common Sensory Logic Application of Respectful Counsel.

Cellular Blueprint

The entire Body manifests from one cell. It is programmed to create a particular Entity. When that cell divides, the next cell has the same programming. All cells that follow have the same programming. Therefore, every cell has the potential to create the Body. However, a cell does not choose to become anything. The program or Blueprint organises the cells.

Is DNA the Blueprint? I do not Think it is! It has Motivational programs, and Physically Creative Potential through Common Sense, but no Intellect.

A Blueprint is constructive. Intellect is receptive and constructive potential. It takes on board and builds

upon concepts. The only part of a cell with Intellect is a Porphyrin, which in its basic form has Intellectual or receptive and constructive Motivation. In its more complex forms, it has the potential for programmed Agreements of receptive and constructive Motivation.

Are Porphyrins more than just pigments? Of course they are. They absorb visible light. In plants, Chlorophyll, which is a porphyrin, converts light into a specific energy. Through Intellect, all life forms evolve. Does the Heme in Blood, which is a porphyrin with the potential for programmed Agreements of receptive and constructive Motivation, do more than we Think? Without Blood, the Brain does not function. Without programmed Agreements of receptive and constructive Motivation, the Brain does not function. Without programmed Agreements of receptive and constructive Motivation, the Body does not function.

Continuum

Pure Potential is an infinite source of possible Thoughts. Mind is a Dream of Pure Potential, which is an accumulation and categorisation of Thoughts. Mind is a Dream, and Mindstates are Dreamstates of that Mind or Dream. A Self-perpetuating Dream is a Self-perpetuating Mind.

The Unconscious Dream or Mind unfolds due to Self-awareness's Suggestive impressions of Attitude and Common Sense. A Self-perpetuating Attitudinal behaviour-based Common Sensory Logic Reality would result. The Unconscious Dream or Mind could become a Conscious unfoldment due to Intuition's Suggestive impressions of Desire. A Self-perpetuating Personalised Attitudinal behaviour-based Logic Reality would result. In both cases, the Sensory impressions would form a Singularity of Thought within the Mind or Dream. One would be an Unconsciously programmed Singularity and the other a Consciously programmed or Subconscious Singularity.

Every Thought influences or evolves the Mind. Therefore, every Thought influences the Dream that we have accepted as Life.
